The Message of Easter

OF ALL the holy days of the Christian year. Easter plows deepest into the

numan soul. Its very name is derived from the name of a goddess who was the personification of spring, of the rising of the sun, of things new and fresh and charged with gladness and hope.

Easter celebrates the Resurrection-and the retarn of storing, with all its triumphant significance that eternally beckons forward the human race. Easter is the time when the frosts and storms of winter have spent their

power, when Mother Nature at last has succeeded in bursting through her suffocating fetters, when her vast creative energy starts once more to function and provide

Then the life of flowers is driven back into the roots, trees, revitalized, lif ip their leaf-colored greening boughs; blossoms, robern, commence again to bid; sirds sing; field and meadow, forest and farm everywhere proclaim to the world. that tempests and setbacks and invisions and failures are simply fertilizers for growth; that the thing to do is to stop grieving over misery and misfortune and to continue searching, probing, groping and striving; that the outlook is never so black as it seems, and that though all about is night there is niways lighta head

Spring is Nature's attempt to make us understand that we can begin again; that the past will take care of itself if only we will give the present a chance; nor any comment hor handlenn can bermanchly keep down a man who may fall down but refuses to he down. So. Easter is not only a season for reputing and commemoration-it is God's message of cheer and inspiration. It is His voice whispering to us through all His resurrected children that it is always the right moment to set forth anew; that so long as we have the attempt, it is never too late to try again; that if we can resist and persist and "come back" -- with unbroken spirit and unflagging effort and undiminished determination to win-few hopes or ambitions are vain.

The marriage of Frances Carter and Jerry Page began on a fifty. Afty basis, Frances paying half the bills. How-ever, it didn't work out well at all, for when the Harlowes moved into the same apartment house. Clarissa turned out to be the typical clinging vine, and in consequence her appeal to Jerry was very different from Frances' straightforward attitude. Frances' straightforward attitude Frances' straightforward attitude the had missed something in her relationship with Jerry and she set out to become very feminine. But although she made her-self attractive to other men, Jim Har-lowe in particular, she did not seem able to change Jerry's attitude toward her. Then came the blow in the form of a letter containing her discharge from the nowspaper.
