# The Secret of Welsh Tin.

N your grandfather's day roofing-tin was all Welsh tin. For some unknown reason it seemed rust-proof. It would last for a lifetime, while other tin was gone before you knew it.

To-day all is different. Able and inquisitive American metal men have discovered the secret. It is mainly the presence of a certain proportion of copper in the plates. Now American mills make the best tin in the world. They make NU-DURA-TIN, which has already jumped into fame because of its wonderful rustresisting power. It makes the old-fashioned tin roof more than ever the roof for city buildings, or wherever there is danger of fire.

Ask any roofer to name the he mentions NU-DURA-TIN. you're safe!
