Philadelphia, Saturday, April 2, 1921
GUTTERSNIPE COURTESY
The earliest principles of peanut politics have been applied by Council in its vote to deprive its law committee of its proper functions in Harrisburg.

ONE HEART'S DESIRE
AN EVENT unique in the progress of science will take place at Washington this May when Miss Curie will be formally granted her heart's desire.

SELF-DETERMINATION IN TIME
UNTHINKINGLY, international committees and other small teams in several states experimental work in the field of time.

PAROCHIAL PROTESTS
IT IS not difficult to detect the source that inspires taxpayers' outcries in the many meetings of some residents of the manor and Roxborough to protest against a new system of county taxes.

COLD FIRE
WHO can remember a spring which has been so warm as this? From the north and west orchard countries are coming in a deluge of apples and peaches.

there was no holocaust such as was expected by the growers.
It is a delusion to suppose that there is no excitement in a farmer's life. In no other business does a man have to sit with folded hands and watch the destruction of all the work of months.

HARDING CAN PREVENT RAILROAD NATIONALIZATION

What the Country Needs Now Is Determined Leadership in Support of the Legal Plans for Solving the Problem
EVERY consideration of the railroad problem should begin with a definite understanding that the railroad workers would like to have the railroads returned to government control.

MR. KRAMER Laments
THIRTY-EIGHT all the letter writing by Prohibition Commissioner Kramer to Senator Capper, of Kansas, in explanation of the wisdom of the dry country, there runs a wistful, almost plaintive, note.

it in detail to the different railroads in the country.
The outlines of the plan are laid down in the law. The plan is workable if the dispossessed are willing to be fair with one another and give and take for the sake of preserving industrial peace.

FREAK FROSTS AND FOGS

Recent Cold Wave Most Damaging in Years—Some Celebrated Storms and Winter Weather—The Famous London Fogs
By GEORGE NOX McCAIN
WHEN all the returns are in and a reasonably accurate compilation of damage done to crops of the country by the cold of the winter of 1920-21, it will be found that the loss amounts to millions of dollars.

"N-NOT FOR ME!"

The trouble with Charles' "coup" was that it was soft.

Every time the Job Combine raps DeWitt it does him honor.
The weather man celebrated All Fool's Day with the rest of us.

Expurgated papers seem to indicate that the Hungarian dash proved a blank.
The birds are the only home builders that are getting away with it this year.

Interest in the British coal strike is not lessened by conjecture as to how Lloyd George will meet it.
Sometimes the thing most insignificant may cause the most annoyance. Witness Bergdoll and a mosquito.

The "coup" has, moreover, been a subject of conversation in a local court trial did much to make it one of ridicule.
Presumably the new pension commission, Washington standard, will be able to weed out the incompetents.

Every run of sled is a run of luck to busy fishermen; and the diner on sled does not find his hand too hot.
In North Dakota the Socialists appear to have made the race that is to be long than with a "reel" nose.

After Charles has been thrown out a sufficient number of times it may dawn on him that the Hungarians don't want him.
Prohibition Commissioner Kramer says home-brewing is a "pastime" that will "die from its own results." No harsher aspersion has ever been cast on amateur hook.

Secretary Hoover is to retain the commissioner of fisheries appointed by the last administration. Pie-counter rustlers may skip the fish course on the political menu.
The lamentable and depressing thing is that the woman who achieves notoriety in the courts and threatens to go on the stage is sometimes able to do what the three are unable to do.

Bergdoll's captors have been released by the Germans "on good behavior." Ever so many Americans are of the opinion that it was for "good behavior" that they were arrested.
The convalescent grip fever gnashed His teeth (with rage, I think) To see freemasonry dashed.

And indignantly restrain He gives his egoistic way With one "G" on the blink.
The remarks of Secretary Wallace of the Department of Agriculture, concerning the protection of agriculture "listen well," but they don't tell the whole story. It is well that we should make ourselves "self-sustaining, independent, self-reliant nations, agriculturally, industrially, politically," and he was wise in deploring the unwisdom of the end of our agricultural resources for the benefit of our industrial and commercial life.

But there are one or two common sense facts that are not sufficiently stressed. A protective tariff remains a protective tariff only while the market is a purely domestic market. The moment it begins to export its product the tariff on its foreign competitors becomes an explicit tariff and the outstanding public at home becomes the goat of commerce. President Harding sensed the basic economic principle when he said that we have to buy before we can sell; but the industry protected thus, Foreign competitors can usually get square by imposing tariffs of their own. The real evil lies at home when American exporters, for instance, pay more for American steel and American beef than the English pay for American steel and American beef, after ocean freight has been added to transportation. After twenty-six years in a protective tariff and the outstanding public at home becomes the goat of commerce. President Harding sensed the basic economic principle when he said that we have to buy before we can sell; but the industry protected thus, Foreign competitors can usually get square by imposing tariffs of their own. The real evil lies at home when American exporters, for instance, pay more for American steel and American beef than the English pay for American steel and American beef, after ocean freight has been added to transportation.

NOW MY IDEA IS THIS

Daily Talks With Thinking Philadelphians on Subjects They Know Best

COLONEL W. P. BARBA On Sesquicentennial Transportation

A NEW survey of the transit situation in Philadelphia, with the problems involved should be made at once, not only to cover present-day requirements, but to prepare for the difficulties attendant upon transporting millions of visitors during the sesquicentennial celebration in 1926.

IN BRUCKS COUNTY this week, we heard a few miles of each other, which we heard that suffered great damage and others in which the losses were largely limited.

THE cold wave most disastrous to the South occurred in January, 1857. Florida suffered \$4,000,000 damage to its fruit crop.

THE cold wave most disastrous to the South occurred in January, 1857. Florida suffered \$4,000,000 damage to its fruit crop.
