### MOTION PICTURES URGED FOR U. OF P.

Students and Alumni Keen for Preserving Campus Activities in Films

### EARLY ACTION IS EXPECTED

Motion pictures are being urged as a means of preserving campus activities of the University of Pennsylvania. Students and alumni backed the suggestion with enthusiasm, the alumni particularly regarding the pictures as of great value in showing graduates back to the University at various alumni gatherings. It is expected that action will soon be taken by the student council to arrange for the taking of the pictures.

The Acting Goodspeed, who is chairman of the undergraduate student council at Pennsylvania, said yesterday he thought the idea was a splendid one. "I can remember when I was in Holland during the war I attended a movie show and was thrilled to see the representation of the Army and Navy football games played on Franklin Field and to recognize one of our star athletes. There would be no end to the pleasant recollections that our alumni would experience if they could look upon themselves from a future age over the vista of years elapsed since their graduation from college, and once more visualize their own intimate collegiate relations."

"So far as I know, the matter has not hitherto been taken up by our committee, though we have had models of various athletic sports. But it seems to me a splendid suggestion, well worth considering seriously, and I believe the students would be strong for it."

William J. Cronin, instructor in physical education, said he had already considered having screen pictures taken of the work done in physical culture in the approaching summer session.

"We are looking forward to a very large summer attendance," said Mr. Cronin, and in hoping we may have some of our work done in the gymnasium, and pictures of the girls as well as the boys, in the swimming pool. But I think it would be a splendid plan to work out a complete set of screen pictures, beginning in the fall and including not only all the football games,

### SAYS SAN DOMINGO WANTS U. S. WORD

Dr. Jackson Asserts Island's Progress Depends on Our Policy

"The wheels of progress will not revolve in San Domingo until President Harding makes some definite statement of policy concerning conditions there under the guardianship of the United States," said Dr. Thomas S. Jackson, assistant health commissioner of Pennsylvania, at a meeting of the Philadelphia branch of the American Pharmaceutical Association, held in the College of Pharmacy last night.

Dr. Jackson spent six months on the island as director of the national laboratories and inspector general of sanitation for the marine corps. The speaker intimated that affairs on the island of San Domingo under United States military rule during the last administration were at a standstill.

"Everybody in the government forces was awaiting a change of the administration when I was leaving there," he said. "There was no construction (either of public buildings or highways or any other kind of private structure). The currency system was virtually shut to pieces and the prospect for the resumption of industry today is not very bright, unless President Harding announces a definite policy."

### Tells of Illiteracy in United States

The annual banquet of the Chester Avenue Improvement Association was held last night in the Kingsessing Recreation Center, Fifth street and Chester avenue. Among the speakers was Archibald Webster, of the industrial relations committee of the Chamber of Commerce, who told of illiteracy in the United States in general and in Pennsylvania in particular, and said that efforts must be made to end this evil. Herbert Eyster, president of the association, also spoke. About 250 guests were present.
