The first step taken to launch the fight against the mosquito pest was to

assign particular areas to the naval authorities and to the city for clean-ing up. Commander Allen said be would be responsible for the land east of Broad street and the city will have opervision over that lying west,

The first move will be to cover the entire territory with oil. After that the rubbish that litters pands and ditches will probably be removed and the slutees put into operation.

It was brought out at the meeting that the Navy Department has been

were virtually inoperative, due to the refuse which chokes them. Samples of water from these pools were smulyzed and found to contain "embryonic mosquite larvae."
