SHORT INTEREST KEPT ON THE RUN

Further Advances in the Industrial Groups, While Railroads Conspicuously Lagged

New York, April 25.—The industrial stocks made further substantial advances in today's stock market at the expense of the short interest, while the railroads were conspicuously lagged.

While there were many important factors entering into the situation that could be regarded as incentives for additional expansion on the constructive side, the urgent buying with the consequent advance in prices much the same as in the preceding sessions came largely from the continued covering of the overvalued short interest.

In the industrial division the forward setting, which had been a progressive type and reaching out practically to all the individual groups, favored strongly of manipulation. With the short interest practically on the defensive it was comparatively easy to keep them on the run, and this was accomplished by selecting those stocks which had been in scant supply for some time.

A further advance in the price of Pennsylvania crude oil was the incentive for the renewed demonstration in the oil, with Mexican, Colombian and Houston Oil remaining the outstanding feature in the petroleum group.

Studebaker led the leaders with another advanced uptick of nearly 3 points, with Chrysler again a close second. Sears-Roback represented the specialties with a spirited advance of over 2 points. The remaining members of the shorts, however, was reflected in the short advances made not only in other specialties, but also in the oil, food and other shares which only recently were conspicuous targets of bearish operations.

NEW YORK STOCK EXCHANGE TRANSACTIONS

Table with columns: Div., High, Low, Net, etc. Lists various stocks and their trading activity.

Commodity Markets

GRAIN MARKET Chicago, April 25.—The wheat market was quiet and weak. The only selling was caused by the slump in Winnipeg, while later the weakness in cash wheat induced liquidation and short selling.

LIVESTOCK QUOTATIONS

Chicago, April 25.—CATTLE.—Receipts 26,000 head. Market strong. Hogs.—Receipts 47,500 head. Market strong. Sheep.—Receipts 10,000 head. Market strong.
