## New Organization, Taking Full Control, Turns Prices Back Three Years

The last step in the Maxwell reorganization was the sale of the Maxwell properties to the new and powerful organization, May 12.

The first step of the new organization was to raise the value of the good Maxwell still higher, by restoring prices to the former low level of 1918.

The reduction is \$150 on each of the four models, effective at once. This is the second price revision made by the new organization; and the total reduction from the high level, since Sept. 28, 1920, has been \$310 on open cars and \$350 on closed cars.

What this latest action means, literally, is turning back Maxwell prices to the basis of 1918.

The truth is that the good Maxwell today is a better car than it was three years ago.

It has been given a new goodness, by lowering costs, by increasing plant efficiency, and by greatly improving the manufacturing practices.

The new organization now owns the great Maxwell plants outright. Its way is clear to carry out in full its larger plans and policies. It pledges itself never to stop working for the further betterment of

the good Maxwell, and for the greater satisfaction of present and future owners of this good car.
