"Beauty sleep" is not an idle expression, because physicians agree that undisturbed rest means everything to a woman's beauty, health,-and sweetness of disposition.

And so, the modern housewife is making a serious study of the all-important bed question.

Make this interesting experiment

An interesting home experiment consists in making a careful inspection of every bed. Perhaps you may find certain beds that rattle and creak, or mattresses may be hard and lumpy, or some bedsprings sag. Any of these faults means that someone is losing that rest so necessary to health.

Then, we suggest that you go to your bed dealer who will be glad to consult with you on your bed problems. He may tell you about Barcalo Beds -built of sturdy steel in attractive designs, or perhaps he will show you Barcalo Springs-and the Barcalo Kapok mattress, clean as the sunshine and full of soft comfort.

But, in any event-get your dealer's advice. He will show you that 10 cents per week invested in better rest will pay you the greatest dividends in the world-health and happiness.
