

**THE FASHION WORLD**  
PLAYING DOMINOES

By CORINNE LOWE  
Above we are showing a frock to illustrate our text. This simple little frock is designed for the girl of from fifteen to twenty-two, and it draws upon a background of white crepe de chine black roses of self-made embroidery with white.

**Making More Money**

Three Men's Jobs  
Ever since the war commenced to take its toll of male labor the newspapers and magazines have been full of accounts of women who were filling men's places and doing men's work so satisfactorily that it was doubtful if the male contingent would ever be re-employed. But there is at least one woman in the country who is doing more than this—three times as much. In fact, for Mrs. Anna Kosta, of Adamana, Ariz., isn't content with filling the place of one man, but is performing the work of three!

**Down Stairs Store**

THAT is often heard, especially when people have just come in from the heat and the glare of the street. It is a relief to find such a place in the midst of a hot Summer city.  
Fresh air is being pumped in all the time and not alone fresh air, but cool, washed air! The air is sent through sprays of cold water, both to cool and clean it, so that when it comes into the Downstairs Store it is fresh and sweet like evening breezes after a shower.  
To complete the system of ventilation, the warm, used air is being drawn out all the time. Thus the air in the Down Stairs Store is being constantly changed and is much fresher and cooler than that in the average home.  
Many people from West Philadelphia and the outlying suburbs come in on the Elevated trains to 13th street, get out at this subway station, take the few steps into the Down Stairs Store, do their shopping and go home the same way. Therefore, they are never once up on the hot streets and their shopping is done with economy of time, energy and money.
