

THUGS ROB WOMAN ON LEAVING AUTO

Mrs. Anna Conley, of Camden, Held Up Here as Husband Seeks Gasoline

Two bandits held up Mrs. Anna Conley, 614 Clinton street, Camden, at Eighth and Christian streets, late Saturday night, and, after taking jewelry and money valued at \$300, escaped, according to a report made to the police today.

Mrs. Conley motored to this city with her husband to make a call. Conley stopped the car on Christian street near Eighth to obtain gasoline.

Her husband failed to return promptly and she went to look for him. Two men who saw Mrs. Conley leave the car offered to direct her to a place where she could obtain gasoline. Just as she passed a small street on Eighth street below Christian, the men suddenly drew revolvers and ordered the woman to throw up her hands.

They then tore a gold wrist watch, studded with diamonds, from her wrist, took several rings from her fingers, also her purse, which contained several dollars.

The men backed away and told her not to move for five minutes. The robbers had an automobile waiting nearby. They escaped in the car.

Make Your Garden A Wonder Garden

It's easy. Market growers know the secret. Follow it and you will have the largest crops of fruits and vegetables, an abundance of the biggest and sweetest scented flowers of the most intense and vivid colors.

Here is the secret:
The better grades of commercial fertilizers contain only 3 to 5 per cent Nitrogen, 6 to 10 per cent Phosphoric Acid and 3 to 5 per cent Potash, and are banded in material that has no fertilizing value, but makes weight and an odor of the full 100 per cent quality.

Science has produced a tablet that is rich in plant food, containing 11 per cent Nitrogen, 12 per cent Phosphoric Acid and 15 per cent Potash, and it is odorless and clean.

Four tablets dissolved in a gallon of water is used in place of liquid manure and is less trouble and gives better results than the objectionable manure water.

Three or four tablets (one every ten days) placed in the hills with a dibble makes Cucumbers, Squash and Melons fairly jump, also Climbing Ornamental plants.

In hills, other than vines, use one tablet to each hill.

For crops in drills, use one tablet to each foot of row.

In Flower Beds and Borders, place tablets one foot apart.

Bush Fruits and Shrubs, use three to five tablets, placed in the soil with a dibble about each plant.

Fruit or Ornamental Trees, place tablets two feet apart and extending out from the trunk as far as the longest branches.

Good also for cold frames, hot beds, greenhouse benches and pot plants.

Each tablet contains highly concentrated, immediately available plant food and enables the grower to control the development of plants. They increase production, lighten color and improve quality. Their use is highly profitable.

The name of the tablet is Stim-U-Plant. No matter how fertile the soil, Stim-U-Plant is effective in feeding and forwarding crops. Market Gardeners all over are ordering in large quantities. Order by name—there is no substitute.

Price delivered: 100 tablets, 75 cents; 1000 tablets, \$3.50. The same result with ordinary fertilizer would cost double and more.
