# TO RERUN GOLDEN WHEEL

### Carman, Corry, Seres and Maddona

So many requests poured into the offices of the Point Breeze Park Velofrome for the re-running of the Golden Wheel, the 50-mile grind won by Clarence Carman, of America, last week, that the management has decided to put on the same competition on Thursday night. The same four bikers-Carman,

Vincenzo Maddona, of Italy; Georges Seres, of France, and Frank Corry, of Australia—will get away with the crack of the starter's pistol. Because of several accidents to the bikes used by Maddona he was entirely

at of the race last week after the firs five miles and instead of a four-cornered event the grind materialized into a three-man event. Carman went way out in front at the start and he never was headed. The re-running of the Golden Whee

will give Seres a chance to redeem him-self as well as Maddona. Seres, who recently arrived from France, did not have a chance to fully acclimate himself. A special sprint match also will be decided, while a number of amateur races will complete the program.

#### Willie Herman Wins

Jersey Chy, July 12.-Willie Herman, of ateraon, N. J., defeated Johnny Donnelly, f Newark, in a scheduled twelve-round bout pat night.

# Costs and shipping losses reduced by packing them right

HURLED into a net on the lighter's deck so hard that break-age seemed certain—then hoisted up and dropped with a crash into the freighter's hold-that's what happened to a big coastwise shipment of liquids in glass during the longshoremen's strike, when the only available labor was "green" and careless.

"Other cases would undoubtedly have been smashed," said the firm's transportation manager after witnessing the rough handling, against which he protested in vain. "But the Gair corrugated cases withstood the shocks. The loss on this particular shipment was less than we would have believed possible."

Not only have breakage and damage claims been reduced to a minimum by the shift to Gair cases, but pilfering has been practically eliminated by improved sealing methods, and a big reduction in packing costs assured.

This is just one example of the ingenuity and mechanical skill which characterize Gair service. We have saved American manufacturers millions of dollars by solving the most difficult shipping problems.

Our fifty years of experience in packing goods of every description enables us to work out the size and shape of case best adapted to the individual product. Our intimate first-hand knowledge of modern transit conditions and shipping regulations often points the way to important savings by utilizing more economical packing methods. We can decide without prejudice whether corrugated or solid fibre cases are best-for we manufacture both.

## Unique features of the Gair system

We control the whole process of manufacture, from careful selection of the raw stock to printing the finished product. The same plant which turns the pulp into boxboard also produces the case complete, thus eliminating costly trans-shipments and delays in manufacture.

With mills located at six strategic points-each mill specializing on some particular problem-Gair service covers all the essentials of package merchandising: Folding boxes, Labels, Shipping cases. Display advertising. We also supply boxboard in any quantity. The Gair system is the largest of its kind in the world. All its resources - unrivalled mechanical facilities, years of knowledge and experience, the skilled services of a staff of experts-are at your disposal. A letter or a telephone call will bring our representative at any time.
