Tomorrow Is the Last Day to Get What You Need for the Coming Week-End

That Little Streamlet in the Valley of the White Mountains clear and clean, bursts out of the earth in a little waterway which it has made for itself.

For many long years it has been running on as if it belonged there as much as Mt. Washington belongs there. It must be as old as the mountain rainstorms. Age has not altered it, not even to make it gray.

It smiles beautifully wherever the sun smiles, and at nights the stars of centuries have kissed its lips, as if in gladness for its song.

Why should people get old or cease to smile and sing the whole way through?
