

GIRL'S ASSAILANT HUNTED IN WOODS

Search All Night in Wissahickon for Man Who Tried to Assault Bertha Mayer

RESCUED BY PASSERBY

Groups of angry men searched the Wissahickon woods near Manayunk all night in an effort to catch the Negro who attempted to assault nineteen-year-old Bertha Mayer.

The girl, who lives at 214 Sumac street, was sitting on the steps of a path leading to Wissahickon Park early in the evening. She was reading a book and becoming startled at a sudden movement in the bushes back of her, turned in time to see a large Negro leap at her.

She screamed and started to run, but the Negro seized her and started to drag her off, placing his hand roughly over her mouth to stifle any outcry.

The girl's faint cries were heard by Charles Boss, 3308 Hetta street, Wissahickon, a watchman, who was going home from work. Mr. Boss hurried to Mrs. Mayer's aid and the assailant fled. The girl is suffering from shock and faintness on the face, where the Negro struck her.

WILL RESTORE MAIL TUBES

Postal Commission So Recommends to Hayes

In all probability the pneumatic mail tubes will be restored in this city. The Joint Postal Commission yesterday decided to recommend to Postmaster General Hayes the restoration of the tubes in New York, which were abandoned, as well as those in other cities in the administration of Burleson.

Do You Walk With a Smile or a Limp?

Wearers of Cantilever Shoes walk with an easy poise that bespeaks freedom from foot troubles. They step out with easy carriage, ankles straight and steady, feet arched with natural grace. They can walk for a long time without fatigue.

Well-fitted shoes contribute importantly to your strength and to your happiness. They must provide room for the toes and freedom for the flexible arch of the foot. They must not check the free play of the muscles. Ordinary stiff-shanked shoes bind the foot and prohibit its natural movement. But the Cantilever shoe has a flexible shank that bends with the foot. The shoe yields with every step, encourages the foot muscles to exercise and keep strong.

The Cantilever last follows the outline of the foot. The toes may stretch luxuriantly. They point ahead as they should for comfort and correct posture. The set of the heel tends to distribute the weight so that the body is well poised. And the shoes are good looking, graceful, trim, correct. Widths from AAAA to E.
