## ATTITUDE ON CONTROLLER IS ONE CRITICAL CORNER

By GEORGE NOX McCAIN The recently organized Voters League s apparently becoming as much of an migma as the mystery ships off the Jersey Coast. It would be pre-eminently unfair, in

view of the short period of its netive existence, to expect too much of the incheate organization. At the same time there has been sufficient opportunity afforded the public to

draw certain conclusions as to the character of its political mission. Principally the questions are:

Is the League to be a square outand-out independent force working
solely in the interest of the taxpayer,
as opposed to contractor politicians and
their allies? Is it to be the catspaw of very clever and astute politicians? or. Is the organization to be defuly util-
