**Sleeveless Slip-On**

for Sport Wear

By CORINNE LOWE

ence. Her sanctuary is still the coat sweater. On the whole, too, the latter has decidedly the better of it, for these coat sweaters give full play to the charming lingerie blouse of batiste or handkerchief, which is plaited, hemstitched, frilled, and usually long sleeved. These blouses are to be seen most often in white, but coral and old blue models are espoused by some of the most fashionable. Certainly nothing could be more delightful than either of these tints with the white flannel skirt which is the requisite of every resort wardrobe.

Above we are showing another version of the sleeveless slip-over so ardently claimed by the sportswoman. This is of blue wool jersey, and combines charmingly with tailored blouse of white china silk and with skirt of blue, black and white plaid.

**Making Starch**

To make a thick starch or one for collars, cuffs, etc., use one gallon of water and either three-fourths cupful of cornstarch or one and one-fourth cupful of wheat or rice starch. A medium starch or lingerie may be made by using half the amount of starch and the same quantity of water. For a very thin starch such as you might want for curtains and very fine pieces, use one gallon of water and either one-fourth cupful of cornstarch or one-fourth cupful of wheat or rice starch. Always remember that if you add one cupful of cold water to separate your starch grains, you must deduct this amount from the gallon of boiling water which you add later. If you are unable to purchase rice starch, you can cook one-fourth cupful of rice in one quart of water, strain, and add another quart of water to it.—Good Housekeeping.

Average Reduction on All Models Since Last Year

**Price Now—\$1895**

And remember that for five years, including last year, when it sold at \$2600, the Hudson Super Six was the largest selling fine car in the world.

At its new price of \$1895, doesn't it represent incomparably the greatest value in the fine car market?

No judicious buyer today makes his choice without comparing not only the present price of cars, but also their relative values as indicated by the position and reputation they have held for years.

Such comparison today directs intensified interest upon Hudson.

**It Redoubles Hudson's Value Advantage**

There is no need to call attention to the quality, ability and distinction of Hudson. Its leadership in these is a long acknowledged position. It is now in its sixth year as the largest selling fine car. In every way that proof can be offered it has established its right to that eminence. Many of its official records are of five years' standing. They have been challenged incessantly. Isn't it significant that five years of intensive competition has produced no rival to outstrip them?

And consider that many Super-Sixes are today rendering smooth, dependable duty after more than 100,000 miles of service.

Does any car within its new price range deserve consideration upon the basis of comparative proofs?

And among higher priced cars where will you find any desirable quality that Hudson at \$1895 does not give in equal measure?
