

BATHING BEAUTIES IN SHORE PAGEANT

2000 Parade in Great Variety of Surf Garb Before Great Boardwalk Throng

Even Mayor in Trunks Today's Pageant Program of Atlantic City Events

Atlantic City, N. J., Sept. 8.—One of the largest crowds that have ever thronged the Boardwalk as late as this in the season jammed every inch of the planking and banked on either side of a long lane on the beach twenty-five deep to see 2000 of Atlantic City's most beautiful residents and visitors take part in the "bathers' review" this morning.

Of course, besides the beauties there was the men's division, the comic division and the children's sections. In the parade a new feature that fertile brains could devise was on display. But the beauties, the new bathing suits and all the dance of sunlight on happy, pretty faces were what the big crowd thronged to watch.

The suits showed every possible realized dream of the costume makers' art. Colors ran through the rainbow and they branched off into tints and shades that would rival even the sacred kiss of Dame Nature. Girls, short or tall, thin and stout, slender, heavy, blondes, brunettes and every varying shade of nature or the hairdresser are even present.

The Mayor, his cabinet and the members of the committee in charge of the two-day pageant were in the van of the marchers. All the city and municipal officials were in bathing suits, blue trunks, white jerseys and white belts, with their name and rank emblazoned on a large blue shield over their hearts.

Even Police Wore Trunks Next came a band, in white bathing suits, closely followed by a heavy bank of police in blue bathing suits, firemen and life guards.

The life guards in their sun and water stained uniforms made a contrast to the new bright red bathing suits of the fireman.

Father Neptune, attended by his slaves, headed the parade proper. Hudson Maxin, the inventor, who is taking the part of the King of the Sea, got a tremendous ovation. The elderly gentleman has so entered into the spirit of the carnival during the last two days that many fear that he is overtaxing his strength in carrying around the heavy green costume, trident and crown.

He has endeavored himself to the amazement of his admirers, however, he may pay for his fun in the matter of weariness he certainly has found a way into the hearts of those at the carnival and he has no objection to show it in the wildest sort of applause.

Then came the first division, led by the Rotary Club Jazz Band in bathing attire, with wild notes, scales and bars running all over them.

Then came the Hygeia Swimming Club, led by three beautiful bathing girls in one-piece black suits, touched here and there with a brilliant yellow silk.

The "Almae Pie" came next. White and borne on the shoulders of ten husky Negroes, dressed in uniform, upon it the delicious frosting in the person of Miss Gladys Greenmeyer, dressed in a one-piece white silk bathing suit, with white cap and shoes.

One of the features of this division that received the most applause was the Pom-Pom girls' group of the Amberg Swimming Club, led by Miss Ada Taylor, president of the club. Among the Philadelphia members of the organization are Helen Pennycuik, Bessie Ryan and Dorothy Hunnell.

Children Have a Division The second division was the little children's and made the biggest hit of the parade after the bathing girls. About 200 children, dressed in every sort of cute or beautiful costume that loving hearts could devise, made up this section.

The third division was greeted mostly with smiles. It was a sort of men's beauty contest and was the opportunity for the tanned, bronzed gods to show their statures to larger crowds than usual. Twelve beards dashed out with this division and braved the bantering of the watchers.

The comic division was small—but made up in originality for what it lacked in numbers. Among the most noticeable was a tiny little miss, who made the whole distance with a sort of whirling motion. This was to display the fact that she was two girls in one. One side she was Miss 1900 and on the other Miss 1925. There was a great deal of clothes made to make her Miss 1900, but the extra expense was made up on the Miss 1925 side.

If she had not been so tiny it might be that beach combers might have got in their work even if it was a feat.

The other outstanding costume in this group was two girls dressed entirely in opalescent, iridescent, iridescent and Purple Lingerie.

Then came what every one had been waiting for. The fifth division was divided into two parts, one for amateur beauties and the second for professional. Here came the riot and color and pulchritude that made the morning such a huge success.

Among the Philadelphia girls in the amateur section were Marie Bajay, Bess Williams, Mary Gilbert, Beatrice Roberts.

Night Display Entrancing Last night the entire beachfront was on fire with a blaze of light. All the street lights had been painted and cast and varied reflections on happy faces of white-capped waves. From the roofs of the big hotels and the long piers dozens of powerful searchlights played

ATLANTIC CITY'S GALA NIGHT DISPLAY

Like a bit of Fairyland was the way the Atlantic City shore line looked last night when lit up for its annual carnival. The photograph is shown looking up the Boardwalk from the Steeplechase

about the sky from the time darkness fell until nearly midnight. The lights blazing on the gay clothes of the women and the fluttering banners stretched across the Boardwalk were eclipsed in brilliancy only by the burst of fireworks just before 9 o'clock. At about 7:30 King Neptune made his first public appearance since the morning, when he witnessed the judging of the beauty contest in Keith's Theatre. His throne, guarded as always by the big-muscled, husky slaves, was placed on the beach near the end of North Carolina avenue. Directly in front of it was a huge specially-erected platform, bunting covered and with fluttering pennants flying above it.

Here the king of the deep was entertained by fancy dancing by children and grown-ups. Just as the dancing carnival closed the air was rent with a series of deafening explosions, as bomb after bomb was hurled high in the air and exploded over the king's head. Life savers, invisible in the darkness of the ocean, suddenly became revealed, bathed in colored fire, when they released dozens of dancing, dancing giant searchlights even were dimmed by the magnificence of the rockets, set pieces, bombs and flares and every other conceivable fireworks device.

Then for half an hour one of the largest fireworks demonstrations ever attempted at the resort leaped and played its beauties into the night heavens. The procession of the "stupendous illumination"—that's what the program called it, and that's what it was—the procession formed about King Neptune once more and, headed by two bands, marched to Steeplechase Pier. Here a costume ball began which extended far into the small hours. A special throne and table had been erected for the venerable King Neptune and he sat, surrounded by his court and framed by the competing beauties, smiling benignly on the whirling merry-makers.

In Confetti Showers In the midst of confetti of confetti, dancers, from the tullest to the tullest, to gray-haired "married folks," laughed, gasped and moved through intricacies of modern dances. Every eye was turned to the king, who, conceivably was on the floor. There were prizes offered for the most beautiful, the most original and the funniest. There was much to choose from in each class.

The judges found the task before them a hard one, but every one was so good-natured, the music was so continuous and the confetti sparkled so delightfully that whatever their carefully guarded secret decision is it is certain to be lauded in the wildest sort of applause.

No accidents of a serious nature were reported and nothing happened to dim the unalloyed joy of the whole occasion.

WEDS SALVATION LASSIE

R. E. Walbridge Marries Miss Irene McIntyre, Decorated for Valor Boston, Sept. 8.—(By A. P.)—Miss Irene McIntyre, whose exploits as a Salvation Army lassie overseas in the Twenty-sixth (Yankee) Division, won her a distinguished service cross, was married here yesterday to Robert E. Walbridge, of Peterboro, N. H.

The bride is the daughter of Colonel and Mrs. W. A. McIntyre, of the Salvation Army. The lace on her gown was made by peasant girls of Yonkersville, France, who gave it as a token for services she rendered the village.

POLICE VETERANS QUIT

Lieutenant Was 31 Years on Force and Patrolman 45 Lieutenant of Police John K. Keith resigned today from the Police Bureau after thirty-one years' service. He had an enviable record of never having been reprimanded. He was made a lieutenant in 1910.

The Civil Service Commission gave an honorable discharge to Street Sergeant Adam Sanderson, seventy-eight years old, who had been assigned to the Germantown police station for forty-five years.

City Treasurer's Report

The report of the City Treasurer for the week follows: Receipts, \$2,302,353.12; payments, \$1,655,808.67; balance (not including sinking fund), \$23,139,057.24.

We pay!

If your salesman's samples are lost, damaged or stolen You insure the goods in your store or factory, why not have protection for them when they are in the sample bags of your salesman? They certainly are exposed to a great many more hazards, such as fire, theft, pilferage, etc.

U. S. Mandate Move Scored in League

Continued from Page One Aland Islands to Finland, saying he regretted "that the Council took into consideration arguments that ought not to apply."

Swede Brantishes Threat

M. Branting suggested that the members might cut off their contributions if the League did not succeed in producing results more in accordance with its fundamental principles.

Lord Robert Cecil praised the frankness of M. Branting, but defended the secretary of the League for charges of extravagance and partiality. The Council's work had been good, Lord Robert said, but he thought it might have put in a little more work.

"It is impossible to settle a dispute with satisfaction to both sides," he declared in referring to Mr. Branting's criticisms of the Aland Islands award. The fact that the Council had reached a decision which both parties regarded as a great achievement.

"A continuation of the Polish-Lithuanian controversy after all the efforts that have been made to settle it is an international disgrace," Lord Robert said.

Hopes for Justice in Silesia He appealed directly to these countries to put an end to the dispute. He said he hoped the Council would arrive at a solution of the Silesian question which would appeal to the whole world as just.

The Commission on Disarmament has decided to hold open session and give fullest publicity to its work. This decision was reached upon the motion of Lord Robert Cecil supported by Signor Schanzer, of Italy, and Rene Viviani, of France.

Panama has notified the League that its representative in the assembly will be Kaoul A. Amador, Panamanian Charge d'Affaires in Paris, and that he will arrive in Geneva today. The Peruvian Minister to Bern has arrived in Geneva and is awaiting instructions from his Government in answer to an inquiry as to whether his Government desires him to attend the assembly. The Costa Rican delegate took his place in the assembly today.

Buenos Aires, Sept. 8.—(By A. P.)—Rejection by the Assembly of the League of Nations of amendments to the covenant of the League proposed by Argentina may be followed by the withdrawal from the League of certain Argentine republics, including Chile, it is learned here in reliable sources. Argentina has notified the League that she will withdraw from the League if her amendments were not accepted.

Reports from Geneva stating that the Committee on Amendments had rejected the one proposed by Argentina providing that all sovereign states should be members of the League unless they voluntarily abstained from membership, were commented upon by Foreign Minister Pueyrredon last night.

He said this action would result in the absolute and permanent separation of Argentina from the League. The foreign minister declared the action of the committee did not surprise him.

"When the Argentine delegation withdrew from the Assembly last night," he continued, "I was sure it was a

Rich Gold Vein Struck

Prospectors and Miners Stamped to Fairbanks, Alaska, Sept. 8.—(By A. P.)—Reports here last night describe the richest gold strike since Cleary Creek days, along Wilbur Creek north of here. A stamped of miners and prospectors was underway immediately. Advice reaching the Fairbanks News Miner by telegraph, mail and in person, indicated sensational discoveries.

Deaths of a Day

James G. Woodrow The funeral of James G. Woodrow, formerly active in politics in the Twelfth Ward, who died at his home, 2131 Bainbridge street, Tuesday, will be held on Saturday at 2 P. M. from an undertaking parlor near Eighteenth and Chestnut streets. For many years he was chief clerk in the Coroner's office. He retired from the office in 1906. Mr. Woodrow was a member of Mount Holyoke Lodge, Free and Accepted Masons, and the Bethany Brotherhood.

Dr. T. M. O'Rourke The body of Dr. T. M. O'Rourke, a physician and former athlete, who died Tuesday night at his home, 1921 Spring Garden street, will be taken to Waterbury, Conn., for burial. Death resulted from overwork during the influenza epidemic. Dr. O'Rourke was a graduate of Villanova College and served for five years as chief resident physician of the Medico-Chirurgical Hospital.

J. G. Davis' Funeral The funeral of James G. Davis, who for more than twenty-five years was superintendent of records of the United Gas Improvement Company and who died on Sunday after a long illness, will take place this morning from his home, at 5115 Aspen street.

Mrs. Dillon's Funeral The funeral of Mrs. Emma C. Dillon, wife of Dr. Fred J. Dillon, who died at her residence, at 1609 North Thirtieth street, on Saturday last, will be held tomorrow morning. Mrs. Dillon was well known in the Seventeenth Ward previous to her marriage. Her father, John Walls, was prominent in Democratic politics. As Miss Emma G. Walls she is remembered as a teacher in the John Maffei Public School, Second and Jefferson streets, where she served fifteen years.

Military Funeral for A. F. Ervin A military funeral will take place for Anthony F. Ervin, Jr., killed in action in France, October 18, 1918, whose body arrived here last night from Hoboken. Services will be conducted in the home of his grandfather, Anthony F. Ervin, 1526 North Broad street. Ervin served with Company E, 113th Infantry. He was in the printing business in Buffalo when he entered the service.

CHEMISTS BOOST ORIENTAL BEANS

Say Vitamines Make Them Superior to Navy or Lima as Food

By the Associated Press New York, Sept. 8.—(A. S.)—Askski, or Oriental beans, and vitamines, as they affect calves, eggs and chickens, came in for a share of discussion today at the various sessions of the American Chemical Society at Columbia University. The askski bean, which is virtually new in the United States, was declared to be superior in protein value to the old-fashioned navy bean, or its big brother, lima. The subject was taken up in a paper prepared by D. Brown Jones, of Finks and C. E. J. Gerstorf, of the United States Department of Agriculture, Washington. The paper declared that the bean lacked, however, a sufficiency of the important sulphur-bearing acid, cystine, and should be served with foods such as eggs, milk and meat. The article of food, which does not require cooking, was originally grown only in Manchuria, Japan, China and Korea. In Japan it is used for making soups, gruels, confections, cakes, as a flour for shampoos and a base for facial cream.

Vitamines were discussed in two papers, one by Professor J. K. Hughes, of the Kansas State Agricultural College of Manhattan, Kansas, declaring that calves nursed by cows that were fed on food containing a small percentage of vitamines were likely to go blind.

He described experiments carried on at the agricultural college to prove his point, and declared they showed that while cows that ate few vitamines might produce a fairly abundant supply of milk, the quality was so poor that it was not adequate food for their young. Mr. Hughes, in another paper, declared vitamines in hens' food had a great effect upon the quality of chickens hatched from their eggs. Low percentage of vitamines means a low percentage of strong, healthy chickens, he declared, while experiments proved that the hen fed with food containing a plentiful supply of the invisible food factors usually became the mother of husky chicks.

"Don't count your chickens before they are hatched," he advised, for, he said, statistics showed that about half of the some 600,000,000 eggs set in the United States each year actually hatched. This he said, meant a loss of about \$12,000,000 and could largely be eliminated if more vitamines went into the grown hens' food.

NEW PILGRIM MEMORIAL Granite Sarcophagus Dedicated on Site of Mayflower Band's Cemetery Plymouth, Mass., Sept. 8.—(By A. P.)—The General Society of Mayflower Descendants today dedicated a granite sarcophagus as a permanent memorial to the Pilgrims—half the Mayflower band—who died in the Colony's first winter on the Plymouth shore. The monument stands on the summit of Cole's Hill, facing the open sea, and on the site of the first burying ground. "Here, under cover of darkness, the fast-dwindling company laid their dead, leaving the earth above them lest the Indians should learn how many were the graves." This was one inscription on it. The bones of some of the Pilgrims, which were taken from the canopy over Plymouth rock last December, have been deposited in the memorial.
