

MYSTERY SHROUDS SINCLAIR MURDER

Akron, Ohio, Gambler Shot and Killed by Pursuing Motorist

HAD NO KNOWN ENEMIES

Akron, O., Sept. 16.—(By A. P.)—More light on the circumstances of the murder of Harry Sinclair, of Akron, early Thursday is being sought today by Cleveland and Akron police. Two leads were followed yesterday in an effort to run down the identity of his slayer, but County Prosecuting Attorney A. W. Doyle reported little progress. Sinclair was driving the roadster of a friend, R. E. (Red) Smithers, who was also in the party with two women, when, according to the story told by Smithers, a car raced up behind from

which two shots were fired which struck the body of the roadster. The third shot fired by the pursuer was passing killed Sinclair instantly. The two women in the party substantiate Smithers' story. Friends of Sinclair state that he had no known enemies. He was known to the police as a gambler and police believe that he may have made some bitter enemies in his profession. The police have discarded the jealousy theory on which they worked yesterday.

HOHENZOLLERNS AFRAID

Quitting Germany Because of Conditions There—Seek Safety in Holland Doorn, Holland, Sept. 16.—(By A. P.)—The strong feeling against the ultra-Conservatives in Germany, which has manifested itself since the recent murder of Mathias Erzberger, is believed

here to be the cause of several members of the Hohenzollern family leaving Germany and coming to Doorn, where they are expected to remain with former Emperor William until they consider that conditions in Germany are favorable to their return. The ex-emperor's daughter, formerly Princess Victoria Louise, now the Duchess of Brunswick, accompanied by the Duke and their children, arrived here yesterday. With them also was former Prince Adalbert, third son of the ex-ruhr.

THE STEELE IDEA
OF INDUSTRIAL CONSTRUCTION

Valley Forge

Symbolic of all that is noble in our national life—an American shrine dedicated to the sagacity and courage of General Washington and his colonial troops, who encamped there during the terrible winter of 1777-78. The bravery, confidence and resourcefulness manifested there during the darkest period of our country's history stand forth as beacons to the present generation, which, in the words of President Harding:

"Ought to have the courage, the appreciation, the resolution, the conscience and the judgment to maintain unendangered the inherited foundations of the fathers."

With this historical background at its gates, Philadelphia cannot afford to be delinquent in its civic or industrial progress. We must become imbued with the confidence and courage of our forefathers and build for the future with the same determination that marked every word and deed of the founders of the United States.

Our wealth, our growing population, our industrial requirements and present favorable economic conditions warrant us in inaugurating immediately our delayed construction program.

We, as engineers, architects and constructors, of industrial and commercial buildings, offer a service supported by 57 years of experience, which we gladly place at the disposal of any executive who has building problems.
