Cleveland Girl Says She Is the One Sought by Wealthy "Hobo"

Cleveland, Oct. 11. - A girl who believes she is the one for whom Jack Searles, rich Alaska lumberman, has been searching, was found in Cleveland yesterday. From the time it is built, a wooden house decreases in value - though the ground often increases so much as to hide the loss on the house.

Successful business men no longer regard their enterprises as speculative. New methods and safer methods reduced the failures in the Philadelphia Federal Reserve Bank district from 926 in 1916 to 512 in 1918 and 330 in 1919. Men study business as a science nowadays - and practice it with every regard for the rules that govern it.

Business Science demands business news on which to base business action-a definite knowledge of market conditions and the events that govern them.

A business man must have all the business news. A table of quotations means little without the record of all the circumstances that influence their upward or downward trend.

A newspaper must bring all this news to the business man or it is not a business man's newspaper.
