Tender Gums -A Warning

Beware of gum tenderness that warns of Pyorrhea. Four out of five people over forty have Pyorrheamany under forty, also. Loosening teeth indicate Pyorrhea. Bleeding gums, too.

Remember-these inflamed, bleeding gums act as so many doorways for disease germs to enter the systeminfecting the joints or tonsils—or causing other ailments.

Forhan's positively prevents Pyorrhea, if used in time and used consistently. As it hardens the gums the teeth become firmer.

Brush your teeth with Forhan's. It cleans the teeth scientifically-keeps them white and clean.

Brush Your Teeth With Forhan's-How to Use It Use it twice daily, year in and year out. Wet your brush in cold water, place a half-inch of the refreshing, healing paste on it, then brush your teeth up and down. Use a rolling motion to clean the crevices. Brush the grinding and back surfaces of the teeth. Massage your gume with your Forhan-coated brush - gently at first until the gums harden, then more vigorously. If the gums are very tender, massage with the finger, instead of the brush. If gum shrinkage has already set in, use Forhan's according to directions, and consult a dentist immediately for special treatment.
