CLOSE-UPS of the MOVIE GAME

By HENRY M. NEELY

Why the "Ultra-Rapid" Camera Makes Action Slow
THERE is a thing that I have lately seen in the movies that puzzles me...

Photographing this at normal speed, each successive picture on the ribbon will show the hand moved one-sixteenth of a foot nearer the lips...

WE PUT talk through the projecting machine at the usual rate of sixteen pictures a second...

Suppose you are an engineer and you don't know where or why a new type of beam breaks under a certain strain...

Especially valuable and astonishing is the opposite phase of motion picture photography...
