

CLOSE-UPS of the MOVIE GAME

By HENRY M. NEELY

You Hear Some Weird Things in a Movie Studio

Some pious and serious minded old lady from the country might be terribly shocked if she should happen to overhear some of the things that are said in movie studio. I'm not talking about morals now ; personally, I've never heard insthing immeral said in a studio. But it struck me the other day that some one who didn't understand the significance of things wouldn't consider it quite etvilized.

I had been talking to Pearl White in the Fox plant. As I left here she The going to commit suicide next week. Why don't you come up and see

How are you going to do it? I asked Shoor yourself?

11

Not drown myself in the river. I have a frightfully had cold, too. I hope p will be begree by then and that the weather will stay warm.

All right " I said. " Ull keep in touch with the studio and come up. Can you imagine the aforesaid plous old lasty overhearing such a conversation as that'

I went up to the studio the following week, but Pearl still had too had a cold to make it wise for her to attempt her sublide. So they were putting her through some of the heavy emoting stuff in the new nicture Herbert Brenon is making with her, and every new and then she nimest wrecked a dramatic moment by successing or having a by of coughing. She wasn't a bit happy

"And will I we got to commut subjude," she walled, "'And by the time I rid of this cold the weather will be freezing and UU get a fresh cold and dably a worse one. I wish they'd let me shoot messif instead." That sort of thing is all part of the day's work in a studie. You get so

used to hearing people to that way that you don't even get the humor of it Every day you'll hear a different savagely arging some man to throw a woman out or some other many to smach still another larger on the jaw and all that sort of thing And you'll much over and get to the set after it's over and see everybody standing around falling in the most friendly way even the two who have not been pounding the daylights out of each other;

"B' I there is our thing I do needs" More With Scampingered. "That B is that the production of the production of the second content on the winter strate. On non-share I still be believe Fore every being colled on to have p in the nation of Aarth in enemated a (a) (a)

GTT ISN'T available that act (prentional) of ourse," she continued. "The

authors probably get the suggestion for the while scenes while they are writing to the supaner and the water is the obvious thing to think about. But don't get at the production of their story until some months later and we reach the water series some time in December or January. That is absolutely true, I've had to jump in when there was its on the river.

They were making one of the big dramatic scenes the second day I was The story is being produced inder the working title of "Discontentment. Miss White plays a shelled society woman, wife of a wealthy man. She becomes discontented, leaves husband and child goes away, meets reverses and then attempts to come back and resume her play

father, the doctor, and the norse about it. There is a cry suiside and they WHAT HAS ALREADY HAPPENED The scene I watched showed her return. The shild was ill in hed, with its start. There is another erg and then another. The door opens and a frightened mail arrowing of the sering wife's return. She drides up the stars, followed by the burler, the busined and doctor rish to the door and she fights desperately but validy as they three net out, with the child riving in bed and calling pitifully for her

Over and every they and to relative this scene. The action had to be timed [exactly right and every one of the series persons had to keep registering the fitting emotion every second of it

I found meanly waving that the fans could be present at the making of such seems. This would realize then how all important the director is in the pro-duction of good pottures. The actors, left to themselves, would simply ruln. everything. And that is natural. They cannot get the perspective on a scene while this are working in it.

And this is monit the way it sounded from Brenom's megaphone. Now stort your action ; you hear the first sty ; turn anifwas around and

She thinks her connected has cause when Presis, a prend of here working in Xeo Yock, tells of vecting some people connected with postion pictures and waks her to visit On her first day in the metion the girl starts on a cost to the alix studios and dains admittance to one of them.

CHAPTER IV

We made so much noise that the itors left the restaurant scene and came over to see what we were doing. The casting director's assistant had taken to the director and I told him Mr. Hunt said I was to be in the mob. and as they were just beginning to shoot that scene I was stuck into it and told what to do, and didn't have any make-up or anything. We rehearsed it once, and then, while they fixed one of the lights, a nice woman lent me her lip-stick and powder puff-it had light eliow powder on it-and told me to ake a soft lead pencil that one of the nen had and fix my brows and darken

DAY OF SCRIPTS WRITTEN IN SUBWAY IS GONE

THE day when a motion-picture dias he jolted to work on a Fort Lee car.

ond accept his small son's recollection of history as a basis for empire-smashing drams, is over. There are a few of the old fellows who still think that pictures can be made in a haphazard manner, but the reluctance producers to let them try it is conining them to hall bedrooms.

Today when a director starty a story he goes into action with a staff of tech-nical experts at his side and the chances for mistakes are reduced to a minimum Not so long ago in motion-picture history a man became an actor by an-nouncing it on his cards. From that moment on he was expected to be able to accurately depict any role from an mbassador to a victim of smnssia

Then a critical public learned that a man does certain things naturally and other things unnaturally. It gradually discovered that a man who was a min-iature painter before he decided to be-come an actor could not lay bricks with that peculiar flip of the trowel which characterizes a good bricklayer.

Today, whenever it is possible, play-ers of small roles are selected from among thousands of extra people who have had actual experience in the particular thing that they are required to simulate on the screen. At Universal City a case in point

ome up recently. When Harry Carey wrote "The Fox," the story upon which he is now at work under Robert Thornby's direction, he incorporated into the narra-tive an important sequence in which the regular United States cavalry partici-

For an ordinary production of the old-time "movie" days a sufficient num-ber of men would have been put in uniform, mounted and sent before the camera. Not any more.

WHEN the envalue sequence is filmed on the Mojave Desert next week two troops of the egulars from the Presidio at Monterey will swing down

Why go to all the trouble and ex-tense of moving troops when any good riders in uniform would have lone just as well? Carey was discussing the subject with

Harry Schenck, production manager at Universal City, and Lucien Hubbard, scenario editor, who wrote the con-tinuity for "The Fox."

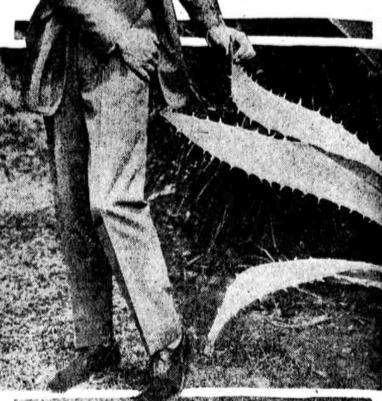

"The only man who can look like a soldier is a man who has done a bitch in the regulars." said Carey. "It's particularly hard to look like a cavalryman." added Schenck, who was a troop commander when he was con-

issioned as major for the late unpleas
