A Bridal Tale

HAVE you noted the very latest in the sports clothes? The skirts are made of the heaviest material possible and instead of being hemmed or stitched and instead of the material. That a narrow fringe of the material. That a narrow fringe of the material. That a narrow fringe of the wave of the same material as the skirt and it is finished material as the skirt and it is finished material as the skirt and it is finished with fringed edges. The fringe on the end of the skirt is not very wide; it's and fringed of the same material as the skirt and scarf, but if they are of plaid the coat is usually done in a plain material and the sports hat matches the coat.

Mrs. Walfer Wood, who was Dorothy Harrison, a daughter of the Charles Custis Harrisons, was wearing such a skirt and scarf on Saturday out at the Pickering Hunt Club, and I saw quite a number at the tunnis at Manheim last manths.

Shoes Your Feet Aren't Forced to Fit

There are shoes that require your foot to fit them; and there are shoes fashioned to fit your feet. To secure your correct fit, you don't have to buy a model that seems homely o you, but you do need a shoe with a natural inner sole line and a snug neel seat, also a flexible arch, for reason that your own foot has a flexible arch. The Cantilever Shoe is a good-looking shoe in which you can obtain a fit better than you have had before. It possesses a flexible arch. When laced up trimly under your arch, a Cantilever gives just the support there you need. steel shank-piece concealed between soles restricts the natural flexibility of your foot nor compels your arch to fit the shank of the shoe. The flexible Cantilever arch conforms to the undercurve of the individual

the undercurve of the individual foot. It is well to remember that the height of the foot arch varies greatly in different feet of the same size, and only in a shoe with a flexible shank can you be sure of proper fit and supports. With every step your muscles exercise as they desire to exercise; your circulation is agreeably stimulated instead of being slowed up; you don't become tired so soon; you look just so much better for not feeling trad; and you avoid footstrain and the many troubles physicians ascribe to that. Allow its 16 fit you in Cantilever Shoes. Learn what supreme comfort may be yours. And see how good looking your teet appear in them.
