sou about them. "They are imported," I explained to one who saw them. "Of course they are," was the reply. The one I have—oh, yes, I had to have one —is pink, a little jolly person who looks somewhat like an Indian. He has real in it, and it just happened that we ran earrings in his pierced cars, and a necklace of beads. And such a droll expres-sion. By all means stop in and see them when you are in town. Incidentally, I can imagine nothing more charming for the top of the Christmas stocking. The price of one is seventy-five cents.

Of course you have noticed how fashionable aquamarine rings are becom-ing. I have no doubt that you probably are counting on having one just as soon as you can afford one. Well, one of the shops that are particularly nice to adventure readers is making a special price on some aquamarine lit-the finger rings. They are square-cut and of a clear green that seems to hold captive the clear fresh color of sen water. The stones are square-cut-oh. yes, I've already said that, haven't I? Well, anyhow, they are set in solid gold hand-chased mountings. Their special price is \$12.

is the difficulty of getting enough rags. But did you knew that you can get cotton pleces ready cut in narrow strips for forty cents a hank? One hank con-tains. I believe, 352 feet. And you can for forty cents a hank? One hank con-tains. I believe, 352 feet. And you can get these hanks in virtually every color of the rainbow. In finding these these banks in virtually every color of the rainbow. In finding these I feel that I have come upon a real

pable of taking such hardships easily. There are people who don't mind wearing rough, serviceable clothing, but they're not the soft-skinned people. There are those whose dispositions are impervious to drab surroundings, but the soft-skinned ones are not numbered among them.

The soft-skinned ones have a fine sense of discrimination. They are caconsiderably more sensitive than the average. But, on the other hand, under favorable conditions, they are capable of getting much more enjoyment out of life. They are not "diamonds in the rough.", and lack stamina, but they are not so hard as the rough diamonds.

Two Minutes of Optimism By BERMAN J. STICH

Not Weakness-Just Self-Preservation

WHEN a physician pronounces a man fully recovered the erstwhile patient is presumed to be restored to good health.

Yet on his parting visit the doctor, as he shakes hands and nonchalantly pockets his fee, will advise :

"Be careful now. Eat three square meals a day. Keep regular hours and tet plenty of sleep. And whatever you do, be absolutely sure that you never igain expose yourself.

Which illustrates that a man who has been really side will not for a while It any rate be in as good condition as he was before, even when the ours is said to be "complete."

And this is because every disease leaves behind it a legacy of traces and britants. And it usually takes considerable time before these potential troublemakers are effectually erased.

If, however, exposure follows before they are entirely gone, then these taginds may become sores, the sores festering spots, and before you know it, the lisease has returned full-fledged, more tenacious than previously, with the olds igainst recovery more than ever unfavorable.

About the same thing is true of the after effects of mental diseases, or fabits.

The man who thinks he has rid blusself of the mortifying and costly sickness "temper," for instance, must be more than usually vigitant to steer clear of stuations which may provoke or rouse his ire, causing him to indulge his anger-Ind bringing all his good resolutions to naught.

There was a certain temperanes lectured who was once a poor, wretchrunkard. A short time after his conversion he was asked to speak in his nativ www, and when he came on the stage he found that strong liquor had been poured ill over the floor so the fumes might rise into his very nostrils. Without a word, ie guit the stage and took the next train for the nearest "dry" town. That man imply would not be tempted.

Of course, it may seem like a confession of weakness to do all to one's power evoid "exposure"-but how much more sensible than to brave it? And how auch better to confess weakness than to run the very real danger of "suffering relapse"?

The only safe way for a man to stay "permanently cured" of any physical ir mental disease is to refrain from feeding it, to do nothing that will encourage ir give it a chance to "develop." And if you can at the same time substitute athing good in its place, so much the better.

And, come to think of it, this course is not weakness at all-not any more han it is weakness on the part of the burnt child to refuse to fumble with firethe man who has had smallpox to keep as far away as he can from

It is just nelf-preservation.
