Los Angeles Coroner Says Philadelphia and Baltimore Clubman Committed Suicide

POWDER MARKS AT WOUND

The body of W. Donnell Stewart, who, according to the Coroner, shot and killed himself at the home of his fiancce in Los Angeles, will be shipped to his home in Baltimore.

Circumstances first pointed to murder. when Walter Nordhoff, Stewart's host and father of his bride-to-be, first discovered the body. Mr. Nordhoff had neard voices in the room over the garage where Siewart slept the night before. In the morning he found the man lying on the floor, with a revolver nearby. Later investigations, however, disposed of the murder theory, and left nothing but suicide or accidental death as the cause of the shooting.

The Coroner insists that powder

ourns on Stewart's head, and his action in sleeping over the garage instead of the house, indicate suicide. Further-more, the position of the wound, it is said, makes it plain Stewart could not bave received it while cleaning the re-volver, although cleaning implements were scattered about.

HOW DO YOU DETERMINE YOUR GRADE?

"This is the lowest figure I am able to get on our grade of letter-paper," said the purchasing

"But how do you determine what our grade of letter-paper is?" inquired the president.

If a letter-paper is palpably beneath the dignity and position of a business, it makes little difference-what it can be bought for.

The thing to determine first is, what grade of paper is good enough for such a business as this

It may not necessarily be as good as CRANE's Bond. But when a business, especially a business of the dominant and prestige building class, feels that it is among the leaders in its field, it ought not be content with anything connected with its business, either the location and architecture of its offices, the dress and manners of its salesmen, the packing of its goods, the character of its printed matter, or the appearance of its correspondence, that is not in keeping with the idea of leadership, of prestige.
