

HARDING ADDRESSES CONGRESS ON NATION'S POLICIES

Continued from Page One
I do not mean that partisan preferences should blind any public servant in the performance of a conscientious and patriotic official duty.

Security in Party Division
There is a vast party division, immensely more of a national account, much larger and more important than where our divisions are along party lines.

Necessity of Legislation
Necessity of legislation is a matter of compromise. The fall ideal is seldom attained. In that meeting of minds necessity to insure results there must be compromise.

Better to Remain on Firm Ground
With all my heart, I wish restoration of the rights of the citizenry. The high-minded public servant who adheres to the highest principles of the Republic as a whole.

No Tax Recommendations Now
Later on, when other problems are solved, I shall recommend that our tax problem, but for the immediate time before us we must be content with the bill now before the House.

Flexibility Highly Necessary
Every contemplation, it little matters in which direction one turns, magnifies the difficulty of tariff legislation, but the necessity of the revision is magnified by the movement.

Menaces in Concentration
The existing scheme of adjusting freight rates has been favoring the basic industry in a large measure, but it has gone steadily on. Perhaps only tariff necessity will correct it, but we ought to find a less drastic remedy.

Wish to Enlarge Executive Power
At this point I must disavow any desire to enlarge the Executive's powers or add to the responsibilities of the office. I have no other plan I would prefer.

Against Denouncing Commerce Treaties
The previous Congress, deeply concerned in behalf of our merchant marine, in 1920 enacted the existing shipping law, designed for the rebuilding of the American merchant marine.

Equality of Opportunity
Through the eradication of illiteracy and the diffusion of education mankind may be able to share more equitably the fruits of the progress of the world.

Reassuring Signs of Business Revival
I am sure about public opinion favoring the early determination of our tariff policy. There have been reassuring signs or suggestions of a business revival from the deep slump which all the world has been experiencing.

Asks Delay in Action
I do not wish to say that the bill is in detail before you today. I wish to say to you that the constructive branch of the Government unhesitatingly will support any measure which is necessary to our commerce.

Relief for the Farmer
"Something more than tariff protection is required by American agriculture. To the farmer has come the era of the heavy burden of taxation and the heavy burden of the tariff. There is actual depression in our agricultural industry, while agricultural prosperity is absolutely essential to the general prosperity of the country."

Public Has Large Rights
In the case of the corporation which enjoys the privilege of limited liability of stockholders, particularly when engaged in the public service, it is recognized that the outside public has a large concern which must be protected and so we provide regulations, restrictions and a supervision in order to control the corporation.

Appeal for Starving Russians
"While we are thinking of promoting the fortunes of our own people I am sure there is room in the sympathetic thought of America for fellow human beings who are suffering and dying of starvation in Russia. A never-dying in the valley of the Volga has plunged 15,000,000 people into grievous famine."

Condemns Strikes and Lockouts
"Finally, just as we are earnestly seeking for procedures whereby to adjust and settle political differences between nations without resort to war, we must seek to settle the differences between organized labor and organized capital and organized labor without resort to those forms of warfare in arms which we have known."

Tribunal to Settle Disputes
To accomplish this would involve the necessity of a thoroughgoing code of practice in dealing with such affairs. It might be well to frankly set forth the superior interest of the community as a whole to other groups, with rights, privileges or immunities, and modes of organization thus carefully defined.

Development is offering so reliable a basis of estimate that the Interior Department expresses the belief that ultimately the present law will add in royalties and payments to the treasury of the Federal Government and the States containing these public lands a total of \$12,000,000,000.

Swamp Lands Reclaimable
"Contemplating the inevitable and desirable increase of population, there is another phase of reclamation full of promise for the future. There are 70,000,000 acres of swamp and other lands which may be reclaimed and made as valuable as any farm lands we possess."

Harding Says U. S. Will Assist World
"Home-making is one of the greater benefits which Government can bestow. Measures are pending embodying this thought in a complete agreement with the States or by private citizens. Congress has a report of the survey of this field for reclamation and the feasibility is established."
