How Should He Be Named?

Dear Conthia—I'm a reader of your column, and seeing how kind you are in giving advice to those who need it, hope you will kindly explain what I wish to know.

The name of my father-in-law is John Jones. His son, my husband, is John Jones. Our little son is John too. Now my brother-in-law has called his little son John Jones. How should each one be distinguished? If we call our son John 3d, would brother-in-law's son be John 4th, or would the fourth be in the next generation? If each one had different middle names it would be easy to distinguish them.

Why not think of your own health? The Federal Bureau of Education includes in its rules to promote health among the Nation's school children, the warning that children should not drink coffee or tea.

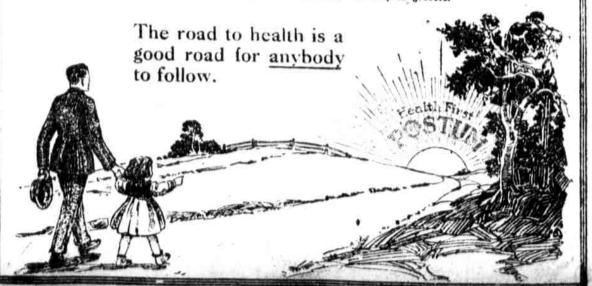

The reason is well known. Coffee and tea contain drugs which stimulate and often over-excite the nerves, and so upset health.

The harm is by no means confined to children, as any doctor can tell you.

If health is valuable to childhood, it is valuable always. If harm to health should be avoided until bodies grow up, is it worth taking a chance with health when bodies have grown up?
