M 188 ANNA had taught the class the four points of the compass very carefully. She felt quite sure that way carefully. She felt quite sure that they know them and decided to give them a little test. So she wrote the questions, and told them to write their answers after they had thought them well out. The question read thus: "If you stand with your face to the south, what direction will you have at your back, and what have you on your right and left hands?" And Mary Louise wrote, "If I face the south I have the north at my back, I have a ring on my right hand and a ring on my left hand."
