War Finance Corporation Doing Business at Rate of Millions a Day

IS RESTORING CONFIDENCE

By the Associated Press
Washington, Dec. 22.—The War Finance Corporation is doing business at the rate of several million dollars a day, according to its annual report submitted today to Congress.
Up to November 20, the date of the report, the corporation said, its advances for agricultural and livestock purposes totaled more than \$82,000,000, of which the principal items were loans on cotton aggregating \$22,000,000, on grain \$18,000,000, livestock \$13,000,000 and for general agricultural purposes \$34,000,000.
Calling attention to the fact that its powers for financing agricultural credit relief were not broadened until last August, the corporation declared it had perfected its organization of credit agencies in various sections of the country, and by the latter part of October its machinery, both in Washington and in the field, was completed.
"Within the last few weeks," the report said, "the corporation has been passing upon four forty re-diffy applications daily, making in the aggregate from one million to several million dollars."
In addition to the agricultural financing advances were reported aggregating \$51,500,000 on exports, of which the largest items were \$28,000,000 on cotton and \$11,500,000 on grain.
Summarizing its loans, the corporation showed that \$52,000,000 had been advanced to co-operative associations, \$72,000,000 to banking and financial institutions and \$50,000,000 to exporters covering both agricultural and export advances.
Entirely aside from the direct financial aid extended, the corporation asserted it was rendering a helpful service from the psychological point of view.
"Its very existence," the report said,

Taxicab Driver Killed in Cleveland Restaurant Fight
Cleveland, Dec. 22.—John Emmel, taxicab driver, was shot and killed this morning in a restaurant, and George G. Beamer, said to be engaged to Emmel's former wife, is being held on a charge of first degree murder.
The police say the shooting is the climax of a three months' feud. It began, according to Beamer's statement to the police, when he first began going with Mrs. Clara Emmel after she had divorced her husband, charging failure to support. Night after night, Beamer told police, Emmel would follow him and threaten death if he went around with the former Mrs. Emmel again.
Beamer was sitting in the restaurant this morning when Emmel and another man came in and sat at a nearby table. According to Beamer, Emmel recognized him, called him names and grabbed him by the throat. Beamer drew a revolver and fired, Emmel dying an hour later.

Equity Joins With Foreign English-Speaking Associations
New York, Dec. 22.—The Actors' Equity Association, in which most of the legitimate actors in this country are enrolled, has formed an affiliation and working agreement with the Actors' Association of England and the Actors' Federation of Australasia, the governing bodies in those countries.
The South African organization of actors has not yet joined the combination, but when it is united with this international body, as is expected soon, it will mean a union of most of the English-speaking actors in the world, totalling 25,000 members.
Frank Gilmore, executive secretary of the Equity, said yesterday that this actors' combination was now one of the most powerful labor organizations in the world.

Chicago, Dec. 22.—Although one death here yesterday was attributed to the cold weather, it was announced by Prof. H. J. Cox, of the local Weather Bureau, that continuous high temperatures in Chicago during the last fifteen months had broken all records. Police surgeons attributed the death of Frank Stewart, seventy-eight years old, in front of his home yesterday to the cold.
On the wings of a storm descending from the lower St. Lawrence Valley, the temperature fell to 14 degrees above zero in the evening. Weather Bureau officials predicted more cold but less wind today.
