4000 JOBS OFFERED TO UNEMPLOYED AS NIGHT WATCHMEN

Mayor's Committee Has Plan to Guard Every Block in Philadelphia

TO AID POLICE AT SMALL COST AND CHECK CRIME

A plan whereby 4000 men will be given work in watching tandistry, is being put into effect by the Mayor's Unemployment Committee.

Provides Winter Jobs This plan will give three months work during the winter to worthy men, and if put into service generally will wipe the names of 4000 from the lists of the unemployed.

It will, it is expected, have a tremendous moral effect upon bandits, for the watchmen, it is thought, will not be uniformed, but will wear civilian clothes.

Physician Sacrifices Life in War on Yellow Fever

Dr. Cross, of Rockefeller Institute, Dies in Mexico While Studying Dread Disease in Plague Center

By the Associated Press. Vera Cruz, Mex., Dec. 27.—Dr. Howard B. Cross, of the Rockefeller Institute, died here today, a victim of the yellow fever.

Dr. Cross came here early this month to open a laboratory for study of yellow fever and the malarial fever for the Rockefeller Institute.

Twelve days ago he went to Taxco, center of the yellow fever district, and after spending two days there inspecting sanitary conditions, contracted the disease. He was immediately brought here, and while recovering from the fever, he died.

Dr. Cross is the second American physician to die here of yellow fever within a year, the first being Dr. Howard H. Henshaw, who died in Taxco in 1920.

The death of Dr. Cross recalls the many tragic sacrifices made by American physicians in fighting yellow fever. Notable among these martyrs of the medical profession was Dr. Walter Reed, for whom a large hospital in Washington is named.

In 1928 Dr. Reed was placed at the head of a board to investigate the epidemic among troops assembled for the Spanish-American War. In 1900 he went to Havana and demonstrated that yellow fever is transmitted from man to man only by the bite of mosquitoes of a certain variety.

Reed and his assistant, Carroll, allowed themselves to be inoculated by infected mosquitoes. Practical application of his discovery resulted in the extermination of yellow fever in Cuba. Both Reed and Carroll became dangerously ill as the result of their experiments.

EARRINGS RIPPED FROM SICK WOMAN IN STORE HOLD UP

Two Bandits Hold Three Men at Bay and Escape With \$1000

Two real bandits methodically held a storekeeper's wife in their grip, tore earrings from her ears, and escaped with more than \$1000 just before 11 o'clock last night.

Charles Besse, proprietor of a dry goods store at 333 North Fifth street, was sitting in the rear of his establishment with Mrs. Elkins, his father-in-law and a neighbor, when the door opened and two roughly dressed young men came in.

One of them held a handkerchief to his face and was apparently suffering from a bleeding nose. Mrs. Besse was approaching him when the younger of the two said: "Get me some handkerchiefs, quick, will you? My nose is bleeding."

Gun Dismounted Man Besse hurried to the rear of the store, where he found a .38-caliber revolver and a pair of trousers. He received a dollar and took the change from it from his vest pocket.

As he turned to go, the younger of the two bandits, who up to this time had stood back, stepped toward her and said: "I'll take those earrings. Give them up."

The shock was so severe that Mrs. Besse was unable to move or cry out. The bandits reached over and pulled the earrings from her ears. She was then held back, stepped toward her and said: "I'll take those earrings. Give them up."

The bandits then fled. Mrs. Besse was unable to move or cry out. The bandits reached over and pulled the earrings from her ears.

As for herself, she said she harbored no resentment because of her imprisonment. The Socialist leader began today a series of conferences with friends and co-workers, which was expected to last until the end of the month.

Debs still wore his prison-issue clothes and declared an intention of returning home in them and of wearing them for some time.

"Take the wrinkles on my face," he said, "they have cost me something."

Terre Haute, Ind., Dec. 27.—(By A. P.)—Terre Haute is abuzz with Socialist today, leaders of the organization from all parts of the country, assembling here as the advance guard of the thousands expected to welcome Eugene V. Debs on his arrival from Washington about 1 o'clock tomorrow afternoon.

Paul K. Reinhold, chairman of the local committee in charge of the plans, said today there would be 25,000 men and women in the parade tomorrow afternoon. A mass-meeting has been called for tonight as a tribute to Debs.

Mr. Rotan's Bride IRISH SENTIMENT ALMOST SOLID FOR PEACE AGREEMENT

Reports from South Indicate 90 Per Cent of People Favor Ratification

By the Associated Press. London, Dec. 27.—Government reports from Ireland, as reflected in dispatches to London newspapers this morning, are overwhelmingly in favor of the Irish Peace Treaty.

The Times sent a special correspondent to County Clare, the county of which appertains to Mr. De Valera to ascertain his opinion. He is known as "the banner county" from its having been the traditional home of Irish nationalist movements.

NIGHT EXTRA

Submarine Issue Likely to Await New Conference

Agreement Then May Be Reached for Europe Like Four-Power Pacific Treaty

Settlement of Shantung Problem is Probable

By CLINTON W. GILBERT Staff Correspondent Evening Public Ledger

Washington, Dec. 27.—The Arms Conference waited today to hear from Paris and from Tokio upon submarines. The indications are that an agreement upon undersea craft will go over to a subsequent conference.

Like the limitation of land armament, which is definitely put over by the sailing of the British army and aircraft experts this week, the submarine question is a distinctly European question. England's fear of being placed again in the position in which she was placed by German submarines in the late war is the exact parallel of France's fear of a German army.

It cannot be dealt with here except upon the basis of the abolition or radical limitation of submarines, and France's demand for submarines depends upon what assurances she can obtain from Great Britain.

A European agreement similar to the four-power pact would probably lead France to modify her position upon submarines. But an understanding between England and France in regard to European and Near Eastern politics is still to be reached.

British Not Averse to Delay A postponement of the submarine question to a future conference would give an opportunity for England and France to get together. It appears here that the English are not adverse to delay. In order, it is said, to give public opinion an opportunity to form upon undersea warfare.

Mr. Hughes would probably like to clean up the submarine issue, but it is not essential to his program. The fact that topics were on the agenda did not mean that the secretary of State hoped to reach a conclusion with regard to them.

Mr. Hughes had two main objects in the conference, to reach an agreement upon ending the Anglo-Japanese alliance, and to reach an agreement upon ending competition in the field of naval warfare, and to end the Anglo-Japanese alliance.

A complete agreement on the setting of China upon her feet, an agreement along the line upon limitation of navies, the restriction of land armament, the ending of the Anglo-Japanese alliance, and without involving the United States in some Pacific combination to replace it were never dreamed of as possible.

Questions Left Open The conference will close on Monday, but it is not settled, but leave it over for the future to deal with. This policy is favored, and it seems probable that the Anglo-Japanese alliance and British success, is likely to be followed with regard to submarines.

Compromise Near on Chinese Tariff

Washington, Dec. 27.—(By A. P.)—Prospects of a compromise agreement on the Chinese tariff question were seen by the Chinese delegation today as the sub-committee of the Far East Committee went into session after a two weeks' recess.

The prospective agreement would permit 5 per cent customs duty on effective 5 per cent customs duty in the present nominal 5 per cent or effective 3 1/2 per cent. This would result in a substantial increase in Chinese revenue.

The Japanese delegation, it was believed by the Chinese, will announce that the most Japan could concede in an upward revision of the Chinese tariff.

Classification War Aircraft

Planes Military Weapons When Manned by Experienced Pilots

Washington, Dec. 27.—(By A. P.)—In the effort to regulate the use of airplanes in warfare, the subcommittee of the Arms Conference which is dealing with that subject today had before it a declaration that all aircraft, airplanes and dirigibles alike, should be considered military weapons only when manned by aviators who have had at least two years' practical experience as military fliers.
