Happiness requires a hopeful, easy

mind. Women who suffer from foot troubles find it difficult to re-

tain hopeful, easy minds. Now that comfortable footwear is so fashionable, more and more women

are beginning to appreciate how much more hopeful, easier-minded

much more hopeful, easier-minded and happier they are in shoes that ease every step. There is a Cantilever Shee designed to fit your foot. It is shaped trimly and fashionably, but with consideration of the natural lines of your foot. Like your own foot, it has a flexible arch. No steel shank-piece such as is inserted in ordinary shoes restricts the free action of your lisaments and muscles. Laced up, it provides just the degree of support you find your arch needs. This flexibility corrects weakened arches, exercises foot muscles as they desire to be exercised improves your circulation, and adds to your vigor and coing. Let us convince you how much comfortable but good-looking Cantilevers can add to your happiness.
