Is This Lovely Ludy

By CORINNE LOWE

A soft chiffon turneth away wrath-

also criticism. And there is certainly a great deal of this placating material being used nowadays for both afternoon

AT LAST-A NOVELTY!

A Mixed Marriage Dear Cynthia-Will you please pub-lish the following letter? Perhaps some of your readers will voice their opinions of the facts which are very puzzling to me.

What to Do

By CYNTHIA

of the facts which are very puzzling to me. Now, a few days ago some of your Jewish readers wrote to you regarding a Christian keeping company with a Jewish girl. I am a Christian fellow, and am keeping company with a Jewish girl. I think very much of her, and she does the same of me. This girl has a sister older than her, and she won't go out with a fellow unless he is a Chris-tian. They are both very nice and refined girls; and naturally we get talk-ing about this matter, and they say that they don't feel at ease if they are around Jewish fellows. To teel the truth, I couldn't explain the reason for this, because I never ansociated with Jewish fellows. If a Christian loves I will have to be made clearer, and I hey some of your readers will help, as it is very perplexing to me. Market a they cant matry a Christian. There's no law to mavent it, but as the solutions of the she cant matry a Christian. There's no law to mavent it, but and the may even be so well known

A Jew can marry a Christian. There's no law to prevent it, but as they think very differently on a subject which is very close to each one, it is seldom to be advised, just as marriager between Protestants and Catholics are not advisable. People look up to him and talk about him, and he may even be so well known as to cause whispers when he walks along the street or enters a theatre. And all the time there is some ob-scure, modest, unpresuming little wife at home who is finishing up the tighten-

She Needs Advice

Dear Cynthia-It seems strange to mo, and yes, wonderful, that there is a column so human and so helpful in this herridly commonplace world as distinguished.

this herridly commonplace work as distinguished. I do not read other newspapers much, and so yours is the first thing of its kind I've read. Every night home from work, I devour your letters, which vary, from pathetic, miserable cries for ad-vice to the silly, concelted writers who but dilly-dally with your splendid an-swers. And never did I think that some day I, too, would need your help. But it is true, and here I am-a lonely orphan-same parents, friends.

About six months ago I met a young man in the office of my employer and was instantly attracted to his being different. I had rather avoided men before that, and he was rather a novely

to me. On thy way to work a few times I have met this young main and have spoken to him. I think I love him and would like him to love me, but there is my problem—"why"? I am not unaitractive, to be candid, and dress nearly if not gorgeously, for I cannot afford that. He is not engaged or otherwhee in love. Please, Cynthia, help me with this, my first real trouble. How can I attract him? I know you can't fail a

Wants His Friendship
Dear Cynthia—I am a young girl the my teens. I have bobbed hair and and my teens. I have bobbed hair and and my sense. Not long ago 1 met a young fellow four years my senior. He is wonderful in all respects. I think a great deal of him. A girl friend of mine also is crassy about him. Sho is very good hair. I have dark hair. I am afraid he cares for the than for me. My reason for thinking this is because at a dance he usually gives her more dances than for me. My reason he sewed them on, and then other reason he sewed them on, and then other reason he sewed them on, and then on this was a genius and had to have some per cularity.
Be friends with the young man, but do not try to attract him away from this other girl. If sho attracts him more, let it go at that.
A Mixed Marcinet.

Two Minutes of Optimism By HERMAN J. STICH

"It's Just My Nature"

"VES, I know I do that; but I can't belp it. It's just my nature.

I Have you ever heard it?

Have you never said it?

behind the skirts of "nature," rather on contrate your determination and energy upon its correction and riddance. If you suffer from an expensive or mortifying fault, don't try to escape

Even "nature," it is being proved thousands of times every day, is a puny, helpless thing compared with determination and energy focused to conquer it.

Determination and energy being so much a matter of the mind may seem to be as light and fleeting as a snowthake; but just consider for a moment the cumulative force of snowflakes.

There was a meeting between a passenger train and falling snowflakes. The snow fell slowly at first.

Its gentle finkes dropped into the hot smoke and exhaust of the engine and were consumed in a breath.

They piled against the hot boller lacket and were licked up in an instant by the heat.

They crept under the wheels and upon the fenders, and then disappeared entirely as the great heavy train rushed on.

What chance of life or influence had a snowflake against sixty tons of iron

and steel driven by the power of steam? Countless millions were hurled aside, unwept and unsung, a sacrifice to the great iron horse and the necessities of men.

But on came the tiny flakes, silently, swiftly, thicker and thicker.

Where a million were consumed a million more leaped to the sacrifice and flung their starlike shapes under the roaring boofs of the monster, as if glad to die to serve the collective life.

And soon, despite its mighty strength, the great locomotive's pace began

to slacken. Slowly and more slowly it moved until at last, with an expiring burst of frenzied effort, it stood still, panting and powerless in the whirling white. As is the power of the snowflake, so is the power of determination and

Outras. The first efforts directed against the things that impede your progress may disappear as though they were feeble snowflakes.

But effort after effort, hurled into the fray in endless procession by man's indomitable determination, beats down all barriers and makes easy the way to ultimate triumph.

Determination and energy-these are the things that enable men to accomplish the seemingly impossible, because determination plus energy can be balked by no barrier—the bigger the barrier the harder the resolute man tries to overge it, and trying, succeeds.

The Meanings of Diseases
