The dress will have a train of ivory silk, shot with eilver, which is being woven by handworkers at Braintree, Besex, an old English silk manufacturing center, where the art of allk weaving has been passed down from generation to generation. So great is the care taken that only a few inches are

finished each day.

The train will soon be ready to be placed in the hands of embroiderers.

Many schemes for presenting welding gifts to the King's daughter are afoot. The Lord Mayor of London is opening a popular fund for the purpose with contributions limited to one pound

viscount Lascelles and his royal bride may spend part of their honey-moon at the beautiful Villa Medici at ricon at the beautiful villa Medici at Fiesole, near Florence. Italy. The villa belongs to a cousin of the bridegroom, Lady Sybil Scott, whose first lusband was the late Bayard Cutting, at one time secretary to the United States Embassy in London.

Camden to Have Charity Ball The Committee of the Women's Auxiliary of Copper Hospital, Camden, has everything set for the second charity ball to be given in the Third Regiment Armory, Camden, Friday night. The grand march will be led by Mrs. Harvey N. Scheirer, president of the auxiliary, and Edwin L. Farr, president of the Board of Managers of the provisal.

HOW OFTEN DO YOU CHANGE THE OIL IN YOUR CRANK CASE?

Ninety (90) per cent of modern motor trouble, engineers and repairmen say, is due to poor lubrication, and investigations prove beyond a question of doubt that this is mainly the result of OIL

Engineers and designers know that oil's ability to prevent friction and wear is NOT guaged in days or miles, but that it depends upon such variable conditions as the season, the grade of oil, the condition of the motor, the driver and how he drives.

Heretofore motorists have had no way of telling accurately when the oil should be changed. The Visco-meter tells when to change the crankcase oil; it warns before damage is done.

Sitting in your car, right before your eyes on the dash you see the fresh, new oil flowing slowly, then as gas and heat break down its body-thins it out-you see it flowing faster. When the jet of oil flowing from the small nozzle across the face of the Visco-meter passes the temperature indicated, then you know that the oil must be changed; you know before damage is done.

The Visco-meter would be the most important instrument on your dash if it did this and no more, but it has other functions: it sets se a correct motor-meter, an accurate oil pump indicator and a real picture of the general condition of your motor at all times.

One small repair bill will cost more than the Visco-meter. It has no working parts and no springs or parts to get out of order. Can be easily in-tailed by any mechanic. Shipped complete olth all fittings.

> When ordering, specify whether for car truck or tractor, and whether to be installed on the dash or under the hood

> See the Visco-meter perform at the

First Place at the Show for the Fourth Consecutive Year

For the fourth consecutive year Buick has been awarded first choice of space at the National Automobile Shows. This honor is conferred each year by the automobile manufacturers who are members of the National Automobile Chamber of Commerce, upon the member having done the greatest volume of business during the previous year. The figures on which this 1922 award was made proved Buick to be the largest builder of six-cylinder cars in the world.

That Buick has retained this position year after year reflects convincingly the high regard in which Buick is held by the American public. Such regard is a logical outgrowth of Buick policy which has been rigidly maintained for twenty years-that every car which leaves the Buick factory must first, last and all the time give that thoroughly dependable and trustworthy service which will make every Buick owner a Buick enthusiast.
