The Furniture You Want at the Price That Suits You

Is Surely in the Wanamaker
February Sale

THIS IS a Furniture Sale made up exclusively of the kinds of furniture that are universally desired. It brings the furniture of universal desire in a choice that has no equal.

Better furniture, infinitely more of it, and lower prices than have been quoted in years.

Better furniture—not only better cabinet work all through, but incomparably better upholstery work.

All the Overstuffed Pieces Have a Curled Hair Filling

When you buy overstuffed furniture, be sure to find out what it is stuffed with.

The one best stuffing is curled hair, and every piece of Wanamaker overstuffed furniture has a curled-hair stuffing.

This is the first sale in which 'overstuffed furniture' has ever been offered at low and medium prices—prices comparatively lower than those asked for overstuffed pieces that are filled with tow or moss or a mixture of both.

And bear in mind that Wanamaker pieces are filled with clean, new, sterilized hair.

Heavy Gorgeous Mongolian Weaves Enhance the Oriental Rug Sale

New rugs, new beauties, new glories of color, new opportunities! These new Mongolian pieces are the finest of Chinese weaves. They are the richest, heaviest Chinese rugs we have had in years, perhaps ever.

The colorings, wonderful golden shades, peachblow, taupe and blue, are rich and glowing, and the patterns are especially tasteful, chiefly floral touches in shades that accentuate the general scheme.

Prices are in every case materially less than prevailing valuations. New Persian Mosuls have also come in—heavy pieces in very good colors—and these are also specially priced.

A Boon to Women in Every Walk of Life

Business and professional women, social leaders, nurses, housewives, women in every walk of life testify to the great blessing Anatomik shoes have brought them. They have relieved distressing foot troubles and nervous and physical handicaps resulting from improperly shod feet.

Anatomiks are the only shoes affording a proper basal support for the body's weight without clumsiness of appearance. The straight last, the specially shaped but not conspicuous heel, the large enough sole and the special adaptation of the interior combine to give them an advantage over every other orthopedic shoe.

The new 1922 models are now ready, carefully made to specifications by one of the best women's shoemakers in America.

High Anatomik shoes of black glazed kidskin come with round toe and low heel, or with narrower toe and higher heel, or in combination last for those who need a broad tread with a narrow heel. They are \$15 a pair.

An Entire Community May Be Horrified by a Defalcation

in a trust company or a business establishment, even though a loss may be covered by insurance or a surplus of undivided earnings, without touching the capital.

Yet, without saying a word of justification of the dishonesty of the employe, is it not worth while to study the influences operating on those who commit the depredations?

Is it not true that avarice is engendered in those associated with us who see and hear us trying to be sharp in making contracts and getting the best of an operation?

A father talks over transactions at home, which his children hear, wherein his cunning and skill leave an impression of excessive effort to "do the other man" to his own advantage.

Are we careful enough in setting examples?
