New Goodness for Spring and New Delights for Each Lingering Day of the Furniture Sale

To Sew on a Button Torn Off a Boy's Jacket
is easy, but it is not easy to undo the hurt of words spoken sharply or cross looks that touched him to the quick.
The natural trustfulness of a child in an older person and especially in the teacher, is such that he comes to us believing that we can and will kindly help him.
Let it be a joy always to do anything for a child. Who was it who said "Give me the children and I will give you a new world"?

[Signed] John Wanamaker

Stripes running up and down, diagonally or across. Satin or crepe stripes or stripes the same as the material. The most interesting thing about these new skirts, however, is the clever way the stripes are used in the pleating.
There are also some new striped skirts fastening to the side and simply gathered in the back and plain in front.
The materials are all-wool velours and wool crepes, and these skirts are the newest and most fashionable for Spring to wear with sweaters and under sports coats. They are all marked \$18.75, and there never has been such a variety at this price.

(Sixth Floor)

The fact that there is only one Wanamaker Furniture Sale is manifest every day of February, but it becomes more and more unmistakable during the last few days.
It is particularly unmistakable this year.
To all appearances, this February Furniture Sale might be just beginning.
In extent, the stocks would be large enough and in character fine enough to give any other sale such a start as it never had.
And yet—think of it—the sale has just three more days to run, It ends Tuesday night.
With the end so near, every minute counts.
Three days to choose from the largest and finest and most desirable stock of furniture in America at 10 to 50 per cent less than regular prices.
Three days to take advantage of the best furniture opportunities in five years!

From Pools to Mirrors
Venice, in the sixteenth century, developed the art of making the modern mirror.
Before that time even royalty gazed at itself in a piece of burnished metal.
Earliest mirror of all, of course, was the glassy surface of a still pool, in nature's own frame of leaves and flowers.
Our modern contrivances for seeing "how we look" serve the double purpose of reflecting and of decorating.
There are certain spaces on the walls where nothing looks quite so well as a mirror.
A mirror for every need, and for every kind of room, will be found at greatly reduced prices in the February Sale, now rapidly nearing its end.
