After the flight to Egypt, oblivion dosed over the family of the Child. The secret of the return, of the settlement for away from Bethlehem—where the tragedy of the siaughtered bubies would make that one Raby forever unwelcome—of Joseph's and of Mary's antecedents of the Child's pretensions to the throne to which He was the earthly heir, the secret of His preparation for a public life, were all well kept, but at what cost to the Child, as well as to Joseph and Mary, one can imagine, too, what lay back of their anxiety—the grown-ups' anxiety—when, after losing Him, they found Him in the Temple, the center of an interested group of men learned in pro-ND that this was the fate of Christ

Persuading the Thinker

The "thinker." as has been explained in a previous article, can be recognized by the head and face, which are wider at the top than across the cheeks or jaws. Nine times out of ten they are the sort of people you would never call "robust." They are oftener small than large. Their bones are small. They may be stout, but oftener they are thin. If an education has not been given to them they make it a point to get one anyhow in one way or another. In these people the mental predomi-nates over the physical.

When you want to persuade a man or woman of this type your quickest road to success lies in starting him or her to thinking. Demonstration may aid, but it isn't the predominant factor as it is in the case of the "square" If your subject has a convex profile

The morning fairly dragged away.

The morning fairly dragged away, and still Rand did not return. At 11:30 Judy put on her hat and coat and went out to do her marketing, hoping in that way to pass the time. But when she returned an hour later Rand was not there, and Judy's fran-

It was nearly 5 o'clock when he walked in, and Judy, busy in the kitchen, hurried out to meet him.

"Rand." she said timidly. She was eager now to make amends, to say that she was sorry, to regain her power over him, but his eyes, when they looked at her, although they were no
