

BAREFOOTED GIRLS DANCE IN CHURCH

Spotlight and Incense Used to
Beautify Worship in New
York Edifice

'EUBHYTHMIC RITUAL' GIVEN

New York, March 27.—Barefooted girls went through a slow dance on a stage in front of the sanctuary of St. Mark's-in-the-Bowery yesterday afternoon in what Dr. William Norman Guthrie, rector of the church, described as an "eubhythmic ritual," expressive of the Annunciation.

The spotlights from two reflectors on the balcony played on them as they danced, and the dimly lighted church fragrant with incense which burned in censers in front and on each side of the altar.

In a short talk explanatory of the dance, Dr. Guthrie attempted to show some of his purpose in the dances and of the unusual adjuncts to church service which he has introduced at St. Mark's recently.

The average person, he said, comes to church to get in the "group-mood," and that what he needs is what will help him to become attuned to that mood. In the church, he said, had lost its old utility, and he had been faced by the necessity of closing the church or finding a new utility for it.

St. Mark's must be open, he said, to the whole religious history of the human race, knowing that there had always been only one God and one religion, although there had been various manifestations of it. The thing to do, he said, is to find a way to the worship of God for intelligent people, and he believes this can only be through beauty.

"I don't believe there is any other avenue for intelligent people," he said. He spoke of the revival of Greek religion after the famous sculptors of Greece had embodied in their work the aspirations of Greek religion and given it beauty.

Garden Gossip : What to Plant and When

PEAS are a trick vegetable. Hard to balance on the fork, for instance! But they're not so hard to raise if you go about it right, and now is the time to go about it, and this is the way to go about it.

Garden peas require a rather rich, sandy soil, with good drainage. Fertilizer should not be applied to the land immediately before planting. Early varieties of seed may be sown now.

Peas will stand any quantity of frost and are the first to ripen. If you want to have a continuous crop, sow every two weeks up to June 1, changing varieties at each planting.

For the best results, plant peas in the bottom of a furrow six inches deep and cover the seed not more than two inches. If the soil is heavy the covering should be less than two inches. After the plants attain a height of four or five inches, the soil should be worked in around them.

The rows of peas should be three feet apart for the dwarf sort, and four feet apart for the tall kinds. All peas growing more than two feet high should have a support to hold them.

Now as to the Noble Spinach. Sow the spinach seed now, in drills one foot apart, at the rate of one ounce to seventy-five feet of row. To avoid

thinning, large plants are gathered first and the smaller or later ones are thus given room to develop. Make your plantings once a month up to June.

New Zealand spinach is a vegetable of distinct growth and flavor. One sowing of this seed is sufficient for the whole season. Sow three seeds in hills 18 inches apart, and when the plants are large enough, cut them for use.

(Tomorrow we'll talk about cabbage and asparagus.)

ARREST SECOND SWIFT SON

Like Brother, Say Chicago Police, He Drove a Car While Intoxicated

Chicago, March 27.—Louis F. Swift, Jr., of Lake Forest, son of the packer, spent four hours in jail in Evanston yesterday, charged with driving his automobile while intoxicated. His car ran into an automobile in which four Evanston high school boys were riding.

In the Swift car were Mrs. William A. Swift, formerly Helen Morton, and Miss Elizabeth Chase.

William Swift, who recently paid a fine at Wilmette for driving a car while intoxicated, managed four hours after the collision to persuade Magistrate Boyer to release his brother on bonds of \$200. Trial was set for next Friday afternoon.

On the parkway in front of St. Mark's Episcopal Church, where the collision took place, the police found two bottles of liquor. A revolver and two clips of cartridges were found in Swift's car, the police said.

Thresher Bros.

"The Specialty Silk Store"

1322 Chestnut St.

Business Hours—9 A. M. to 5:00 P. M.

Announce the

Opening

of the

SPECIALTY SILK STORE

in Baltimore, Maryland, on Monday, March 27, 1922

Thresher Bros., originators of the specialty silk store in the United States, with stores in Boston, Philadelphia, Cleveland, and today they are adding Baltimore. The brothers got their experience in operating specialty silk stores by many years in the merchandise and selling line. One of the brothers has served as buyer and manager of the largest department stores in New York and Boston. Young men, who have been brought up and trained by Thresher Bros., are now a part of the organization, which is second to none. The "sky-line" idea was adopted not alone to permit of the careful matching of colors, but to eliminate the exorbitant overhead fixed charges burdening every department store. The parent store in Boston grew from one employe in a little room on the fifth floor

of an office building to four entire Thresher Buildings extending a whole block in the fashionable shopping district, Temple Place to West street. In twenty years' time from one employe to one hundred and seventy-five silk experts. The Thresher Building was erected in Philadelphia by them to meet the very extensive silk clientele which they have secured in this city. The idea of permitting women to buy silks in the daylight has been so successful that it has already been copied by many throughout the country, but Thresher Bros. have shown that originality and broadness of treatment which has been so largely responsible for their success; in fact, a day's mail has contained mail from three-quarters of the United States.

BOSTON PHILADELPHIA CLEVELAND BALTIMORE

WE MENTION BELOW A FEW OF THE MANY SPECIAL VALUES OFFERED:—

4th Floor

33-Inch Imported Chinese Pongee, in natural color; good weight and firm weave; a quality that will launder perfectly. Our regular \$1.35 quality. Special at..... **95c**

THE TIRE COMPETITION OF TOMORROW

HERE has been more advance in the art of tire making in the past five years than in almost any other one thing.

That so many of these advances originated with the makers of U. S. Tires is perhaps aside from the point.

The concern of the car-owner himself is how he is going to benefit.

If tire manufacturers make no attempt to outrival each other in quality, where does the tire user get his consideration?

The makers of United States Tires urge upon everybody—manufacturer and dealer alike—a new kind of competition.

Let us compete for more and more public confidence.

Let us compete for higher and higher quality.

Let us compete for still more dependable public service.

This has been the developed U. S. Policy over a period of many years.

Today at present prices U. S. Tires are the biggest money's worth any motorist ever rode upon.

For the production of United States Tires there is erected and operating the greatest group of tire factories in the world.

A leadership that has recorded itself with the public. The outstanding example of what faithful quality and sound economy can do when it is patient enough to prove itself to a whole nation.

United States Tires are Good Tires
