Holds Salaries Must Remain Constant, Regardless of Interest to Stockholders

FIGHTS PROPOSED PAY CUT

By the Associated Press
Obicage, March 27.—Characterizing the present principles of wage adjustment as unjust, B. M. Jewell, president of the Railway Employee' Department of the American Federation of Labor, told the Railroad Labor Beard today that costs and wages should remain constant, even to the elimination of prefits, and that until that economic basis was accepted conflict between capital and labor would continue.

Mr. Jewell opened his fight against general wage seductions cought by 205 railroads before the board today. He treated as irrelevant all carriers' arguments of lower living costs and lower wages in other industries; americal "the so-called law of supply and demand will never afford a living wage in a system organised according to modern business principles"; and declared for a living wage for all productive workers of the country.

Wage Earners' Guarantee Urged
Interest and profits must not continue while the workingman suffers low wages and unemployment, Mr. Jewell asserted in presenting his theory of the living wage. A guarantee of steady earning power to the wage carner, even at the expense of immediate profits, he added, 'would go far toward eliminating these recurrent periods of depression."

"We have come here to challenge the justice of the wage rates of all productive labor, to challenge the very principle upon which the railroads propose that rates of pay be adjusted." said Mr. Jewell. "We propose to show how the entire purpose far which industry is operated can and must be changed.

ascertainable minimum of decent living.

"The railroads are saying to their employes, 'we cannot afford to pay a living wage,' while we say that the railroads must pay at least that.

"Out of the annual yield of any industry," Jewell continued, "three things are being paid, costs (including supplies, depreciation, extensions, taxation, etc), wages and profits. Two of these, we say, ought to be constant, costs (reduced to an economical figure), and wages at a level which will allow full human life, inclusive of art, literature, music, recreation and sociability such as are enjoyed by the well-to-do. This leaves profits as the sole variable factor and frankly contemplates a situation in which temporarily they may have to cease. Until that situation has been accepted the conflict between capital and labor will continue."
