Shooting Occurs in Southern Illinois and Two Policemen Are Wounded

**For the first time in history both bituminous and anthracite union coal fields were idle today as the result of the cessation of work by 600,000 miners, effective at midnight last night.**

Union officials asserted that 100,000 non-union miners were included in the walkout and that 6000 of the 7500 mines in the country were shut down.

**Shooting Occurs in Southern Illinois and Two Policemen Are Wounded**

For the first time in history both bituminous and anthracite union coal fields were idle today as the result of the cessation of work by 600,000 miners, effective at midnight last night.

**ADMINISTRATION AT WASHINGTON CONTINUED TO OBSERVE A HANDS-OFF POLICY.**

Dominion Conciliation Board started action to prevent protracted strike in Western Canada.

**OPERATORS IN MORGANTOWN, W. VA., DISTRICT WILL REOPEN MONDAY ON OPEN-SHOP BASIS.**

The anthracite men are striking to support demands for increases of \$1 a day for day laborers, 20 per cent for contract men and the check-off; the bituminous men to maintain their present scale in the face of demands for reductions up to 40 per cent and open-shop conditions.

**By the Associated Press**

Indianapolis, April 1.—Confident that the suspension of work which began at midnight by union coal miners would result today in a complete tie-up of the country's unmined fields, officials of the United Mine Workers of America at its headquarters here await reports from district leaders showing the exact effectiveness of the shutdown.

**At least 600,000 men, 100,000 of them non-union miners, were reported to be enrolled in the walkout, which is planned to continue indefinitely in an effort to force operators to accept the miners' terms for new wage contracts.**

Preliminary reports indicate that few operators, who conduct their mines on the "close-shop" basis, planned to attempt continued production.

**For the first time in the history of the coal industry, both bituminous and anthracite fields are tied up simultaneously. The union estimate was that 6000 of 7500 mines in the country were closed as a result of the walkout.**

The only production by union workers was reported from Kentucky, where 5000 miners are under contract to work for another year.
