

# MEN AND WOMEN AT ODDS OVER UNCLE BIM'S WEDDING

## Widow Zander Finds Few Friends Among Own Sex as Hour of Halter Party Approaches for Millionaire

Who is not to be that is the question: whether "his nobler in the mind" to suffer and avenges of the Widow Zander. Or to take arms against a seasoned hunter. And by opposing, save our Uncle Bimbo.

Herbert Reed, of 1141 South Rubicon street, was of the same mind. "If anything happened to stop this marriage to the Widow Zander," he stated, "and Uncle Bim died and left all that coin to Andy and Min, you'd see them get chummy; just exactly the same as any one else would under the same conditions. The Widow has lots of nerve, and she will win out."

"I don't care," said Miss Elizabeth Lovell, of 308 North Thirty-second street. "I would be sorry to see that woman get Uncle Bim. He is funny-looking, of course, but there is a great deal to him, and he has a strong character, except where she is concerned. It is just a case of infatuation. Something will have to come up between now and Thursday to prevent the wedding."

And meanwhile, gentle reader, you are invited to attend the wedding in the EVENING PUBLIC LEDGER on Thursday.

The piano was standing on the porch, propped up by rollers. The girl approached and leaned against the piano, which fell from its balance, trapping her beneath it.

Suppose she is bad news in the face? She knows how to use the old bean, which is more than most of them can do.

What's Cash For, Anyway? "Why shouldn't she spend it?" he said. "The old boy has so much

# EASY RIDING COMFORT

# STUTZ

## With The New "D-H" Engine and Compensating Spring Suspension

## Greater Performance Efficiency with Maximum Simplicity

Take the very pinnacle of fine car behavior as the minimum of your expectations when you test the "D-H" motored Stutz. It will revise every past opinion that you have formed of what a motor car can be made to do.

It throbbles to a mere creep and darts to 60 miles an hour with greater rapidity and ease than ever before has been possible. Its 90-mile-an-hour top pace so far exceeds any ordinary demand that speeds which tax other cars to their utmost become a mere loafing gait for the "D-H" Engine.

There is never a tremor, so completely is all perceptible vibration banished. So irresistible is the pull of 45% greater torque, which is the useful application of a 65% power increase, that the Stutz over-rides every highway handicap.

Yielding at not a single point to the performance of delicate, complicated multi-cylinder motors, the Stutz with the "D-H" Engine represents so high a development of the fundamentally correct, simple, power unit that it becomes virtually free of all service requirements.

Behind such a motor, riding in the comfort of the Compensating Spring Suspension, an enchanting new motor-sensation is in store for you.
