A Steinway may cost a little more at first, but the greater difference in musical quality; the entire satisfaction of having the piano everyone wants; the longer service it will give; the less final cost—is what makes a Steinway most economical and the fairest priced of all pianos. Style M Grand (5 ft. 7 in.) in mahogany, at \$1375, is a notable example of the fair pricing of all Steinways. # My Life and Work By Henry Ford

Samuel Crowther

in collaboration with

In McClure's Magazine for May

This is the first and only authorized presentation of Mr. Ford's personality and mind.

One of his closest associates, after reading the opening chapters of Mr. Ford's work, wrote of it:

"I cannot tell you with what pleasure I saw the man and his mind in these pages. It has · never been done before. The Henry Ford written about up to this time does not exist. The writers have not been able to see him, and of course, their readers could not."

Here are revealed the simple, original and fundamental ideas that have flowered in Mr. Ford's unique achievements as a manufacturer, a merchant and an employer. In all these three capacities he is the most sensational figure in the world to-day, and as an employer his methods are the most startling that appear in all industrial history.

Mr. Ford has developed and with unmatched success applied a body of principles and practices that he believes to be universally applicable. His views of trades unions, socialistic and communistic ideas, and on banking, are built on such first hand thought and big scaled experience as make them contributions as invaluable as they are remarkable. He asks and gives his answers to such questions as "Why be poor?" "Why not always have good business?" "Why Charity?"

Now neither young nor old, with extraordinary vigor backing his clear and penetrating intelligence, he is at the very height of a creative genius that has done much to change daily human life for the better, and his greatest triumphs may be before him.
