# How did it start?

## —their universal vogue among women?

WHEN short skirts made shoes more prominent, women realized that every detail of the shoe must be perfect.

Nothing more quickly spoiled the looks of the shoe - of a whole costume - than a run-down heel.

And so thousands of women first put on O'Sullivan's for the sake of style. Trim, elastic, durable, they last several times as long as leather and keep their shape through weeks and weeks of wear.

Today these women have found that O'Sullivan's Safety Cushion Heels not only save their shoes but save their strength - protect them from the strain of standing and walking on hard floors and pavements. They will never go back to leather.

When you take your shoes to the repairman, it is important to specify O'Sullivan's Safety Cushion Heels. Ordinary rubber heels are so soft and crumbly that they quickly wear down, or so hard and lifeless that you might as well wear leather. O'Sullivan's Heels combine the proper toughness with the greatest springiness.

The price of O'Sullivan's Safety Cushion Heels to you is generally the same as the price of ordinary heels, in spite of the fact that O'Sullivan's cost the dealer more. Your repairman could make a bigger immediate profit on any one of half a dozen substitutes - but when he puts on O'Sullivan's, he knows you'll bring trade to him again.

Ask for O'Sullivan's when you leave your shoes-see that they are attached. The O'Sullivan Heel Company.
