FINANCIAL

LUKENS STEEL COMPANY
First Mortgage and Deed of Trust Dated November 1, 1920

Bankers Trust Company as Trustee under the above mortgage gives notice that it will receive at its Corporate Trust Department, No. 16 Wall Street, New York City, up to 3 o'clock P. M., on June 8, 1922 sealed proposals for the sale to it for the Sinking Fund at a price not exceeding 107¼% and accrued interest of sufficient 1st Mortgage 20-Year 8% Gold Bonds issued under said mortgage to exhaust as nearly as practicable the sum of $100,665.96 on hand in the Sinking Fund at the date of this notice. Such proposals should be made in sealed envelopes and must reach the said Trustee not later than 3 o'clock P. M., on June 8, 1922. Notice of purchase of bonds will be mailed on June 9, 1922, and the bonds so purchased must be delivered to the Trustee before the close of business on June 13, 1922, on which date interest thereon will cease. In case more bonds are offered at the same price than the Trustee can purchase it will be determined by lot which bonds will be taken. The right is reserved to reject any proposals in whole or in part. Federal Income Tax Ownership Certificates covering accrued interest should accompany accepted bonds.

Dated at New York this ninth day of May, 1922.

BANKERS TRUST COMPANY AS TRUSTEE
By H. F. WILSON, Jr., Vice President.

PITTSBURGH ROLLS CORPORATION
Six Per Cent First Mortgage Convertible Sinking Fund Gold Bonds

Notice is hereby given that the undersigned as Trustee under the First Mortgage and Deed of Trust dated July 30, 1917, of Pittsburgh Rolls Corporation, will receive written proposals up to 3 P. M., Friday, May 26, 1922, for the sale to it of bonds of the above issue to an extent sufficient, at the lowest price obtainable, not exceeding 105, to exhaust the sum of $77,549.64.

Proposals should be placed in sealed envelopes, indorsed "Proposal for sale of Pittsburgh Roll Corporation Six Per Cent First Mortgage Convertible Sinking Fund Gold Bonds," and sent to the undersigned at its Broad street office, Broad and Chestnut streets, Philadelphia, Pa.

Bonds accepted must be delivered before June 1, 1922, or satisfactory security furnished prior to that day that delivery will be made within ten days.

Payment for bonds accepted will be made on July 1, 1922.

The undersigned reserves the right to reject in whole or in part any or all proposals.

Dated Philadelphia, May 8, 1922.
PHILADELPHIA TRUST COMPANY,
By JOHN C. WALLACE, Treasurer.

PENNSYLVANIA COMPANY GUARANTEED 3½ PER CENT TRUST CERTIFICATES, Series "C," Maturing 1942.

Pursuant to terms of agreement dated September 1, 1897, and supplement agreement dated December 1, 1902, the undersigned invites tenders of above certificates for sale and delivery as of June 1, 1922, at a price not exceeding par and interest to the sum of $50,000, the sum now payable to Sinking Fund.

Sealed tenders, stating specific numbers of certificates offered, addressed to GIRARD TRUST COMPANY, Trustee, Sinking Fund Pennsylvania Company Guaranteed 3½ Per cent Trust Certificates, Series "C," will be received until 12 M., May 29, 1922.

GIRARD TRUST COMPANY, Trustee
THOMAS S. HOPKINS, Treasurer.
Philadelphia, Pa., May 15, 1922.

THE SPANISH - AMERICAN IRON COMPANY FIRST MORTGAGE 6 PER CENT BONDS, Due July 1, 1927.

Pursuant to terms of mortgage, dated August 7, 1907, the undersigned invites tenders of above bonds for sale and delivery as of July 1, 1922, at a price not exceeding par and interest, to the extent of $137,682.46, the sum now available in the Sinking Fund.

Sealed tenders, stating numbers of bonds offered, addressed to GIRARD TRUST COMPANY, Trustee, Sinking Fund Spanish-American Iron Company First Mortgage 6 per cent Bonds, will be received until 12 M., May 25, 1922.

GIRARD TRUST COMPANY, Trustee
THOMAS S. HOPKINS, Treasurer.
Philadelphia, Pa., May 13, 1922.

POCAHONTAS CONSOLIDATED COLLIERIES COMPANY, INCORPORATED FIFTY-YEAR FIVE PER CENT GOLD BONDS, DUE JULY 1, 1957.

Notice is hereby given, pursuant to the terms of the Mortgage dated July 1, 1907, that the undersigned as Trustee will receive sealed proposals up to 2:00 P. M. on the 6th day of June, 1922, for the sale to it of bonds as above described, sufficient to use the sum of $45,632.88. The undersigned reserves the right to reject any or all tenders in whole or in part.

THE NEW YORK TRUST COMPANY, Trustee
By A. C. DOWNING, JR., Assistant Secretary.
New York, May 4, 1922.

Dividends

AMERICAN BANK AND TRUST COMPANY
Broad Street and Passyunk Avenue
Philadelphia, Pa., May 11, 1922.

The Board of Directors have this day declared a semi-annual dividend of four and one half per cent (4½%), clear of tax, payable Thursday, June 1, 1922. Checks will be mailed.

ELWELL WHALEN, Treasurer.

Special Meetings

SPECIAL MEETING
Fidelity Storage and Warehouse Company, 1811 Market street, Philadelphia, Pa.
SPECIAL NOTICE TO STOCKHOLDERS:

Notice is hereby given that in pursuance of a Resolution of the Board of Directors of this Company, a special meeting of the stockholders of said Company will be held on the 5th day of July, 1922, at 3 o'clock P. M., at the principal office of the Company, 1811 Market street, Philadelphia, Pa., for the purpose of voting for or against a proposed increase of the capital stock of said Company from $400,000 to $500,000 by the creation and issuance of 7 per cent cumulative, non-voting Preferred Stock to the amount of $100,000 to consist of 1000 shares of the par value of $100 each and callable at $105 per share.

F. L. HARNER.

OUTSIDERS COMING INTO CURB MARKET

List Shows Strength and Further Evidence of Accumulation—Daniels Motor Strong

New York, May 16.—There was a further display of strength and activity on the Curb today, trading indicating a substantial increase in outside demand. At the same time, there was evidence of accumulation of many stocks by interests already heavy holders.

Trading in the new Interborough issues, to be issued under reorganization, demanded special attention. The 6 per cent bonds, which opeend yesterday at 71, made a further advance to 78 and the Interborough stock sold at 97⅞. This issue is to be limited to 7 per cent dividends under the readjustment plan. The voting trust certificates, represtning the stock in its present shape, were traded in at 20½ to 31.

Deniels Motor was one of the strongest of the industrials, advancing to the new high record of 12¼. The buying was partly based on the official statement showing cash on hand of $330,000 on January 31 and total current assets of $1,177,601, against liabilities of only $229,000.

WIEDFELDT AT EMBASSY

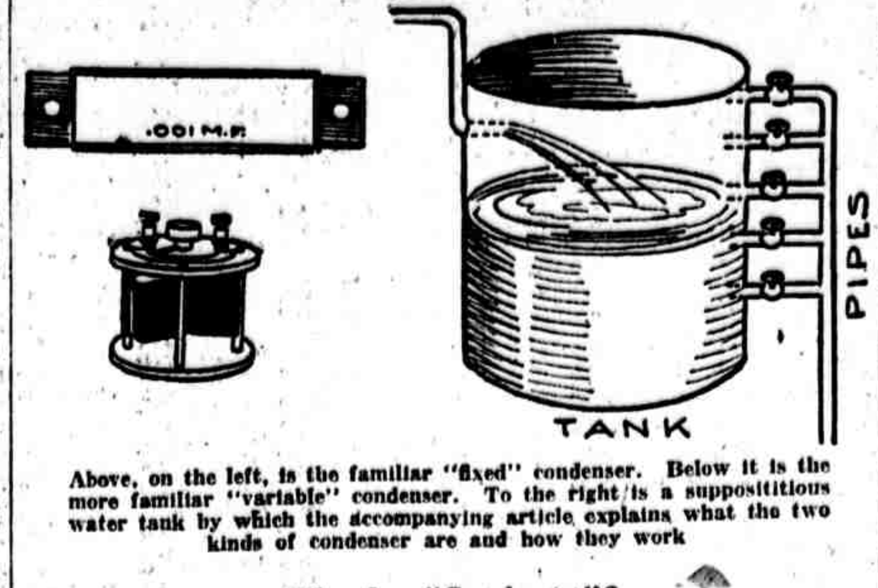
First German Envoy Since Von Bernstorff Reaches Washington

Washington, May 16.—(By A. P.)—The German Embassy housed a German Ambassador today for the first time since midnight February 13, 1917, when Count von eBrnstorff with the passports which had been handed him by the State Department left Washington to sail for home.

Dr. Otto Wiedfeldt, the new Ambassador, arrived at the Embassy late last night, having come to Washington from New York, where he landed last Saturday.

RADIO IN THE HOME

By HENRY M. NEELY



Above, on the left, is the familiar "fixed" condenser. Below it is the more familiar "variable" condenser. To the right is a supposititious water tank by which the accompanying article explains what the two kinds of condenser are and how they work

What Is a "Condenser"?

Your bathtub is a condenser. The kitchen sink is a condenser. The Shoshone Dam and the great dams on the River Nile are condensers. Your bank account is a condenser—a variable condenser—probably exceedingly variable. And the farmer's barn is a condenser.

Anything is a condenser that is used to store something up in until we need it. Your bathtub stores up water. In radio, a condenser stores up energy than we can turn into electric current when we want to use it.

But there's one very important difference to be borne in mind. While the condenser does store up this energy, it will not hold it indefinitely. It stores and discharges and stores and discharges with almost inconceivable rapidity, working up as fast as some three million times a second. But that's what we want in radio, so, for practical purposes, we can say that it stores the energy until we desire to use it.

If we could speak of this energy in terms of pints and quarts and gallons, it would sound a lot simpler, but if you can get into the habit of thinking that these electrical names are simply words to express much the same idea, they will not confuse you so much.

Suppose we have a supply tank at the top of the house. The man who installs your plumbing system will figure out how much water you will need and will instal, let's say, a 500-gallon tank. At the top, there will be a drain pipe so that, when the water reaches this level, it will overflow. That tank will hold just 500 gallons and no more, because, as soon as that limit is reached, the excess water runs out through this drain pipe.

So we, in building radio instruments, have mathematical formulas which tell us just how big a condenser we need in each place in the circuit and we know how to build a condenser that will give us just 500 gallons of the energy we want and will overflow as soon as that limit is reached. Only, in radio, it is this overflow that we use to do the work. And, unfortunately, we don't say "gallons"; we say "MICROFARADS."

And another very important thing to remember is that a condenser in radio doesn't simply let the excess energy flow out. As soon as the limit is reached, the whole thing empties at once, sending quite a powerful electrical current rushing through the wires.

If you can imagine your house tank rigged up in such a way that, when the first drop of water flowed through the drain pipe, it loosened a trigger which let the whole bottom of the tank drop out, you would have a better illustration of an electrical condenser.

Now, suppose you had some sort of system which operated by the force of this sudden discharge of water. The supply pipe would keep on running and every time the supply reached 500 gallons, the bottom would drop, the water would exhaust and the bottom close up again ready to fill once more. This would operate only on a 500 gallon supply. There would be no variation in it.

Then it would be what we call a "fixed condenser." Your phone condenser is fixed. Your grid condenser with an audion bulb is fixed. Sometimes with certain hook-ups you have fixed condensers in other parts of the circuits. They operate when the energy stored in them reaches a certain pre-determined amount.

But we also have "variable condensers," which are of great importance in "tuning" to get a signal sharp and clear and loud. Let us see what they do.

Go back to the illustration of the tank. Suppose we had various kinds of machinery to operate on various amounts of water. Then we would put in a number of drain pipes, each operated by a spigot so that we could open any one we wanted to. We might want them in "steps" of 100 gallons each. If we opened the top one, it would operate the trigger when the supply reached the original 500 gallons. If we opened the next lower one, the bottom would drop out of the tank when we had 400 gallons in it. The next would give us a 300-gallon operation and the next a 200 and so on. That would be a "step variable" condenser—one operating on various set amounts but not operating on any amounts in between.

The condensers which you buy—the twenty-three-plate and the forty-three-plate operated by a knob—are "continuously variable." Suppose, instead of having the spigot arrangement on your tank, the release or drain pipe came right up through the bottom and that we could raise it or lower it any amount we wanted to. The tank would empty as soon as the level of the water reached the top of the drain pipe.

But we can raise or lower the drain pipe with a continuous motion by this arrangement and so we can run the machinery on 500 gallons, or 435 gallons, or twenty-three gallons, three quarts, one pint and a gill and a half or any other amount we choose.

That, then, is a continuously variable condenser such as you all want. And the wise amateur who is experimenting with his own set will make a special sacrifice and buy two of them, for they are mighty handy things to have and save a lot of coil "tapping" when he wants to try a new hook-up that some one tells him about.

Today's Programs

Philadelphia Station (WIP)
(Gimbel Brothers)

1:30—Selections by the Gimbel Orchestra, piano, Raymond Steen; violin, Jacob Uhl; cello, George D'Annunzio; saxaphone, Vincent Guisine.
2:30—Short recital by Leo Sheehan, tenor, assisted by Charles S. Halsall, pianist.
3:00—Piano recital.
7:05—Final baseball scores.
7:15—"Uncle Wip's" bedtime stories.
7:20—"Uncle Wip" will read the names of children writing to him.
7:25—Special demonstration for Boy Scouts of Philadelphia.
8:00—Recital by the Aeolian Glee Club.

Philadelphia Station (WFI)
(Strawbridge & Clothier)

3:30 to 4:30 P. M.—Recital by the Strawbridge & Clothier Male Quartet — John Owens, Ednyfed Lewis, Harold Simonds and John Vandersloot—assisted by Anna Deasgo, soprano, and Mabel Fogg, pianist.
5:30 to 6 P. M.—Baseball scores.

Newark, N. J., Station (WJZ)
(Westinghouse)

7 P. M.—"Man in the Moon" stories of Newark Sunday Call.
7:30—Madame Petrova, famous actress, author of the play "The White Peacock," will sing, recite and talk to the invisible audience. She will tell about her stage and motion-picture experiences and probably tell about the love story of old Spain which she has woven into her play, the "White Peacock." Mme. Petrova will soon begin a world-wide tour.
7:50—"Children's Stories," by Podraic Colum, courtesy McMillan Co.
8—"The Eyes of the World," by Winifred Hathaway, Brooklyn Chapter of American Red Cross Society.
8:10—"Broadcasting Broadway," by Bertha Brainard.
8:20—"Personal Hygiene," by Dr. Donald B. Armstrong, of the National Tuberculosis Association.
8:30—Concert by the Standard Oil Band of New Jersey, Charles Biedman, director.
9:30—Concert by the Police Octette of Newark; Sidney A. Baldwin, director. POPE TO SEE BASEBALL

Pius Will Be First Pontiff to See Game

New York, May 16.—A Pope for the first time is to witness a baseball game soon.

In donating to the Knights of Columbus a site for an athletic field at the foot of one of the seven hills of Rome, Pope Pius, it was announced here yesterday, expressed to Edward L. Hearn, director of the organization's work in Italy, the hope of seeing the American game played.

Pope Pius will be able to watch the game from a window of his study overlooking the field. "I want to see with my own eyes the development of your work," His Holiness said when the project of the Knights for expending $1,000,000 for welfare work in Italy was explained to him. The Pope emphasized the need of athletics for the youth of Italy.

Admits Robbing Store

Horace Johnson, a Negro boy, Lombard street near Eighth, was arrested today on a charge of robbing the store of Benjamin Shapiro, 503 South Ninth street. Detective Anderson says Johnson confessed taking cigars and tobacco valued at $10.

MAN BLOWN TO CEILING

Meets Death Sitting on Alcohol Keg Which Explodes

Norfolk, Va., May 16.—(By A. P.)—When a keg of grain alcohol, on which he was sitting while reading a newspaper in a Portsmouth drug store, exploded last night and hit the ceiling, James Parker, Negro, was instantly killed.

He was blown to the ceiling and then hit a stovepipe before falling to the floor.

Doctors who examined him found he had a broken neck. The keg was undamaged except that the bottom side was blown out.
