Your Panels Need

uite a tidy sum of money.

tin pot lids. And I buy a gross of half-inch-long brass machine screws and a half gross of two-inch-long brass machine screws and a half gross of brass washers, and I'm about ready to

Not Cost a Fortune

Not Cost a Fortune

Dividing panels for mounting radio of course there's nothing to complete the compl

sets, of course there's nothing to com-pare with nice smooth shiny black for-mics or bakelite fronts with helliof course there's nothing to with with nice smooth shiny black foror bakelite fronts with brilliant placed switch posts and blades binding posts. Electrically, it's binding posts. Electrically, it's ery best combination you can get nut to nit them.

For switch contact points, I put the half-inch screws through holes, leaving the head of the screws on the front of the panel. On the back, put on your wire and screw the nut on tight your wire and screw the nut on tight your wire and screw the nut on tight. the very best combination you can get and it makes such a workman-like job that it's a delight to the eye and somery best combination you can get makes such a workman-like job and you have a good contact point. If you want to use them as binding posts, shove them through from the back with a washer on the back of the panel, put which the maker can be proud of he displays it fo his friends. formica and bakelite cost money and nobody is giving away nickel bindwire on the back and screw up hard on the nut. Ther put on another nut on the front, so that you can screw down on a wire when you want to coning posts and switch points. And, if you do the sensible thing and adopt system of construction adrocated in these articles, the various panels, if built of the best, will total

mels, if built of the best, will total To make knobs, drill through the pot knob with a drill the size of the fwo-inch machine screws you bought. Then, a fortune. It can be done with very little cost. The radio expert will frown with a larger bit, big enough to make a hole that the nuts will turn in, enging to give in this article, and will arge this hole front and back to a depth to take the nut, pass the machine seroually and wouldn't recognize one personally and wouldn't recognize one and screw up hard and fast with a serous will be serous the street with a serous driver holding the serous like the nut on the other and screw up hard and fast with a serous driver holding the serous like the nut on the nut on the serous like the nut on the nut of the nut on the nut of personally and wouldn't recognize one if you saw it on the street, you can leave that fine-sounding term to the expert and go shead and have all the fun you want with the stuff I am going to describe. I have myself used this a great deal and, while I might have early the stuff I am going to describe. I have myself used this a great deal and, while I might have early the stuff I am going to describe. I have myself used this a great deal and, while I might have early the stuff I am going to describe.

to describe. I have myself used this a great deal and, while I might have established a criminal record with "dialectric losses" I heard the broadcast concerts and that was what I was after.

Instead of formica or bakelite, you in the can and cut your blade out of that with voice make good court of the great of Instead of formica or bakelite, you tan can and cut your blade out of that was use any good hardwood for your manel. And, if you can't get hardwood, use just wood. And, if you can't get don't let her eatch you at it. She'll declare it will ruin her seissors. I've that, use compo board or heavy cardbard. I made a lot of panels when I found an old desk being thrown away and saved those thin boards that form about. Mostly theory.

indepartitions in the drawers and between the pigeon holes.

Just so long as these substances are thoroughly dry, you won't know that you are having "dialectric losses," but if you use a sappy wood or a damp piece of cardboard. I won't guarantee divided. Then I begin at any one mark and lengthen each tenth mark and then least the arch. results.

For knobs for switches or coupling so long as the tens mark. Then I numbandles or condenser handles, I pay a cent spiece in a hardware store for those little wooden handles made for The dials you buy are usually care-
