He also declares that the University has not relaxed its efforts in the

campaign for endowment.

There have been persistent rumors that the present co-ed system was unsatisfactory and the intimation of a separate college bears out the reports. "One of the problems is that of pro-viding education for women at the University so that they may have access to courses of instruction which shall be in every respect equal to those offered to men," Dr. Penniman said in the mes-"As to the method of accomplishing

this there are differences of opinion, but the majority of those who know the University best are inclined strongly to the plan for a separate college for women, co-ordinate with and equal to The line formed at 2 o'clock at Fifty-second and Race streets, and marched to Baltimore avenue and Erranwood Cemetery.

Will your car throttle down on high gear to less than a mile an hour with the same smooth, silent power flow that you enjoy when it sprints along at the usual driving speeds - and then - respond without balk or hesitation the moment you press the accelerator to the floor?

This is the real test of a motor car-the National test-a test so sharply revealing that any inherent defects in balance, gas distribution, power application and torque are apparent immediately. Try the low-speed test with the 1922 National Six. Bring upsharply

from 30 m.p.h.to a fraction of a single mile. Then step on the ac-

celerator and see how tremorlessly and swiftly the National responds, The same inbuilt power plant perfection which makes it possible for the 1922 National Six to operate at lowest speeds in high gear with such unprecedented smoothness naturally results in other advantages: Speed, when wanted, of more than 70 m.p.h.-acceleration from 5 to 60 m.p.h. in 9 seconds-amazing fuel, oil and tire economy-lessened upkeep expense-longer car life.

There has never been a better National-or a better looking National—than the 1922 National Six.
