# All Day Monday This Store Is at Your Service for Holiday Needs

**You May Travel East or Travel West or Travel South but it is generally a fact you like your home the best.**

However humble or plain, you are glad to be home again.

There are more smiles of approval, more freedom of words, more sympathy and belief in each other, and more sympathy in the family circle, than anywhere else in the world. Anything short of it is only half happiness.

This is what I heard thirty years ago many times from my dear friend J. Russell Miller.

## A Mighty Smart Looking Tropical Suit

No use talking, it's true—if a man hasn't learned the joy of stepping out in a light, airy tropical suit he doesn't know what Summer comfort means.

Some statistician or other might get together a lot of figures to prove that tropical suits pay a cash dividend by saving collars and cutting down laundry bills—but we just say they ARE COMFORTABLE and that's enough for any man.

## Iced Tea Sets

For "the Cup That Cools" on a Sizzling July Day

"The cup that cheers," the poet called it.

The cup that cools, would be an equally acceptable designation for it on a July day.

Iced tea is an American institution that came in response to climatic exigencies.

Iced tea sets are the response that came to the demands of nice people who want iced tea acceptably served.

Probably the most interesting choice of iced tea sets we have ever had is here now.

A set of six tall tumblers that seem to almost refresh one by their looks and one half-gallon crystal jug, light cut in a floral pattern, as low as \$2 for the set.  
Others at \$3.50, \$5, \$8 and upward.

But the most interesting group are sets in strikingly colored crystal—canary, amethyst and blue, with Royal blue handles.

Jug, six handled iced tea glasses and six sippers, together with separate coaster for jug and each of the glasses.  
Prices, \$16.50 and \$18 for probably the most attractive sets we have ever shown.

## The Tie That Sets Off a Man's Whole Attire

Important as can be, but it must be picked out quickly, and in the new lot of 50-cent ties there is such choosing that a man can't go wrong.

Many men are taking half a dozen new ones along on the holiday trip.

Some of the new ones are in a multitude of stripes, varying from pin stripes so close together that they look like a maze of stripes to the bold college stripes; others the neat figures in self color.

But there are thousands to choose from at 50 cents.

## It Is Quite the Fashion to Collect Souvenir Spoons

Especially among motorists who like to take home a reminder of the various places they have stopped. In purchasing one recently, a customer said he had already collected thirty on one trip.

There is a remarkably good assortment of sterling silver spoons with historic scenes and places of interest in Philadelphia.

Coffee spoons, \$1.25 to \$1.50 each. Teaspoons, \$1.75 to \$4 each.  
(Main Floor)

## New Candlewick Bedspreads in Colored Effects

The candlewick in which the designs are done is delft and red, rose, adding much to the decorative effect without marring the old-fashioned character of the spreads.

Made of unbleached muslin and priced in the single-bed size at \$12 and in the double-bed size at \$13.50.

Also a large collection of similar spreads with the designs done in the regular, plain candlewick, not colored, single-bed size, \$9, and double-bed size, \$10 each.

## Those Good Camp Meals Almost Cook Themselves and They Are Ready When the Mess Kits Rattle

Slowly cooking, thoroughly cooking, perfectly cooking all day long while the whole party is off fishing or tramping or hunting.

Burned, charred things become tastily cooked meals when "just fellows" go a-campin'—mother has as much fun as the rest when the whole family goes if

## A Fireless Cooker

is working in the kitchen tent. No need for any one to stay behind and toil for hours over a smoky campfire. A cooker gives mother a vacation, too, and makes the meals better.

A factory expert is here to show what a wonderful help the fireless cooker is in camp or Summer bungalow. A demonstration will be instructive.

## WHAT IS THE Ampico?

A great many people ask that question. The wonderful reports they have heard about the instrument naturally make them curious. "Is it a player-piano?" they ask.

No. It is much more than a player-piano. A player-piano reproduces the music.

## The Ampico reproduces the musician!

You do not actually see him seated at the keyboard. You get his own playing in every shade of expression every degree of intensity, exactly as if he were there. More than twenty-five years ago, when the inventor of the Ampico first listened to a player-piano, he determined to perfect an instrument that would reproduce not merely mechanical music, but the exquisite and thoughtful interpretation of the greatest pianists.

The Ampico is the final realization of his dream.

The most gifted pianists of our time go to the Ampico studios and there play personally the music from which Ampico recordings are made.

Classic or popular, grave or gay, tender ballad or joyous dance—you get it on the Ampico as it should be played.

So much for the perfection of the playing. The perfection of tone is assured by the quality of the fine pianos in which the Ampico is installed—

**The Chickering**  
**The Haines Brothers**  
**The Marshall & Wendell**  
**and the celebrated Knabe**

The presence of the Ampico in no wise alters the size or appearance of the pianos, nor the fact that each of them remains a perfect instrument that may be played by hand in the usual way by the home pianist at will.
