Now we have all moved up one step further. The amateur who knows anything about radio at all is no longer stiafied with the detector tube that he ence thought so wonderful; he will talk nothing but "two stages of amplifica
ton."

The reason for this is that you are adding a number of problematical elements all at once and if there is trouble you can, by this method of tuning each bulb separately, determine whether the trouble is in the detector circuit, the first amplifier or the second ampli-

RADIO IN THE HOME

·---·

Here is the simplest hook-up for two stages of amplification. The

article tells where plugs and jacks should be inserted in case you want

to use them

"Two Stages of Amplification"

tery is the one you already have.

Before this radio craze swept the simple. You plug your phones into hole country the amateur who had a the first jack and tune your circuit

simple diagram which accompanies this

Association Founded by James M. In this picture the phones shown in In this picture the phones shown in dotted lines are the phones used with the detector bulb alone. In adding the amplifiers you remove those phones and hook up those binding posts to the two binding posts marked P on the first transformer. You can use the same storage battery to light all three filaments, but you will have to have another "B" battery to add to the one you use with the detector. The "B" battery shown on the left hand side of the illustration next to the storage bat-Beck-Wanamaker One of Alumni New York, July 3 .- The National Amateur Press Association opened its forty-seventh annual convention yesterday with a reception to out-of-town members. The convention will last four days. William J. Dowded, city editor of the Cleveland Press, unopposed for president. Cleveland will be the

for president. Cleveland will be the next meeting place.

The organization's members edit, publish and contribute gratis to amateur publications, which are exchanged with each other. It covers the United States and Canada, and has associate the illustration next to the storage bat-The dotted lines going from the stor-age battery show the wires that go to light the filaments. I have made them dotted simply to emphasize the distincmembers in Great Britain. The association was founded in 1876 by James M. Beck, Solicitor General of the United States, and others among its alumni are Charles Scribner. John Wanamaker and Thomas A. Edison. don between them and the other wires. Many hook-ups for two stages of amplification use the one rheostat to con-trel the brilliancy of both amplifying hilbs, but I have found it invariably best to put in separate rheostats for in-dividual control.

ENDS JEWISH CHILD SURVEY Let us see now what we will need what we will have to spend to add Would Cut Red Tape by two stages of amplification to our present regenerative hook-up. The prices which I give are average and you may

Uniting Groups Reorganization of agencies in the have to pay more or less, according to the make of apparatus you use: child-caring group of the Federation of Jewish Charities is recommended in a 2 amplifying bulbs @ \$6.50..\$13.00 .70 superintendent of the Jewish Foster 2.00 Home, as a result of a survey of the institutions involved. 2 transformers (a 5.00 . 10.00 2 grid condensers (a .35 . .70 2 sockets (a 1.00 . 2.00 2 Vernier rheostats (a 1.50 . 3.00 plan drawn up by Aaron D. Faber, 5-volt "B" battery (tapped) 3.50 nates all committees except one which would be called the Board of Children's Guardians and consist of the The diagram shows where the phones child-caring group committee already re connected on the second stage of in existence, together with four dele-

are connected on the second stage of in existence, together with four dele-amplification. With powerful trans- gates from each of the eight institumitting stations within twenty-five miles of you these two stages should give signals so loud as to be uncom-fortable with the phones on. Even at much greater distances than that you tions.

The plan probably will be instituted in November and is expected to eliminate much red tape.

should get very strong signals and should be able to insert a horn or one of those CAMP LINDEN OPENS TODAY phonograph attachments in the place where the phones are shown here. Hundreds of Children to Escape

Most people who go to the expense of amplification like to use what is known Hot City Streets amplification like to use what is known as the "plug-and-jack" system. In this, the phone cords are attached to a round plug and there are three "jacks" with holes in them to receive this round plug. One of these jacks would be in the place where the dotted line phones are shown on the left and the other would be in the place where the phones are shown on the right. You will notice that the right-hand phones are shown on the right will be socket and the other side to the has of the "B" battery through one P" binding post of the transformer.

magine the same arrangement at-Camp Linden, near the junction o

magine the same arrangement at-tached to the first amplifying tube and A NATION'S BALANCE SHEET tached to the first amplifying tube and transformer and the place where the phones would be is where you would have your third jack.

The method of tuning then is very

A NATION'S BALANCE SHEET One man became convinced that a nation's affairs could be run as economically as a business copporation. General Dawes tells how be effected an immense saving, without disrupting Government departments. A special article in the Magazine Section of the Sunday Public Ledges. "Make it a Habit."—Adv.
