

**Mrs. Wilson Speaks of Unusual Desserts**

**In the Summer Nothing Is More Refreshing Than a Cold Snow Pudding or a Rice Frumenty**

By MRS. M. A. WILSON

SOMETIMES the children or the old folks find it hard to adjust themselves to the diet of the adult family, and would rather have less meat and a good dessert. This is particularly true of the old folks during the warm weather.

The cold dessert may be prepared early in the day and placed to chill, and if desired for the luncheon, sufficient may be left to serve for the evening meal. The following desserts are planned to serve six to seven portions, so that if mother chooses she can use two part for the luncheon, or make two portions, serving the second portion the next day, with a different sauce.

**Norwegian Prune Pudding**  
Stone cooked prunes and measure sufficient pulp of these to make one cup. Strain the juice, add sufficient water to make two cups, place in saucepan, and add:

Five level tablespoons of cornstarch,  
One-half cup of sugar,  
Stir to dissolve and bring to boil;

add:  
The stoned prunes,  
One teaspoon of vanilla,  
One-half teaspoon of cinnamon,  
Juice of one-half lemon.

Beat well to blend and cook slowly for ten minutes. Turn into mold that has been rinsed with cold water, cool and chill. Serve with thin custard sauce.

**Blackberry and Raisin Tapioca**

Place in double boiler  
One-half cup of granulated tapioca,  
and add

Three and one-half cup of boiling water,  
Stir well and cook slowly for thirty minutes; now add

Three-quarters cup of sugar,  
One-half teaspoon of salt,  
One-half teaspoon of nutmeg,  
One cup of seeded raisins,  
Two cups of prepared blackberries.

Cook slowly until mixture is quite thick. Cool, then add

Two well-beaten eggs,  
One cup of evaporated milk.

Turn in pudding dish, and bake in slow oven for thirty minutes. Cool, chill and serve with cream.

**Grape Sponge**  
Place two level tablespoons of gelatin in one-half cup of cold water to soften for half hour. Now put in saucepan

one cup of grape juice, either homemade or bottled juice,  
One and one-quarter cups of cold water,  
One-half cup of sugar,  
Three level tablespoons of cornstarch.

Bring to boil, cook slowly for five minutes, then add

The prepared gelatin,  
Juice of one-half lemon.  
Remove from the fire and cool. Now fold in the mixture begins to thicken, fold roll in two stiffly beaten whites of eggs; rinse a mold with cold water, turn in the sponge, cool and chill. Serve with crushed and sweetened fruit.

**Dainty Marshmallow**  
Place in small mixing bowl  
The whites of two eggs,  
One-half glass of apple or quince jelly,  
and use Dover style egg-beater. Whip to a stiff meringue. Now fold in

One cup of whipped cream,  
One cup of crushed pineapple,  
Six macaroons or lady fingers, broken in small bits,  
One cup of marshmallows, cut in tiny bits.

Put into tall, thin glasses and dust the top with grated sweet chocolate, serving ice cold. This will make six portions and is a delicious dessert.

**Rice Frumenty**  
Place in double boiler  
One quart of milk,  
Six tablespoons of rice flour,  
Stir to dissolve the rice flour, cook until mixture reaches boiling point, stirring frequently, and cook slowly for half hour. Then add

Grated rind of one-quarter lemon,  
Juice of lemon,  
Two-thirds cup of sugar,  
Three well-beaten eggs,  
One teaspoon of vanilla,  
One-quarter teaspoon of nutmeg,  
Three tablespoons of butter.

Cook slowly for ten minutes. Then rinse custard cups with cold water, and turn in the prepared frumenty, cool and chill.

**You Can't Do This To Ordinary Shoes**

Did you ever try to bend an ordinary shoe at the arch the way the one in being bent that heads this advertisement? Try it some time. You'll find it won't bend, because every ordinary shoe has a stiff strip of steel in the arch, which holds it perfectly rigid just where you see this

**Cantilever Shoe**

flexing so gracefully. Cantilever Shoes do not have a piece of steel in the arch. They are made with a flexible, all-leather arch, which harmonizes with every step you take and allows your foot to flex naturally and the muscles to function freely—just as nature intended.

Cantilevers fit the feet snugly, supporting and controlling at your work or play—walking, standing or sitting. The fashionable rounded toe gives plenty of room, while the well-placed, flexible arch and excellent fit of Cantilever, corrects faulty posture and helps to tone up the whole system by improving the circulation and minimizing fatigue.

Step into a Cantilever dealer's and ask for a demonstration of Cantilever flexibility. With AAAAA to E.
