THIS week I am bringing to this corner the story of a young housewife who through death found the must be the wage-earner for the little family of four persons. This housewife lived in a large mid-West city, and after thinking things out pretty well decided that she would not care to leave her home and children while she went abroad to seek employment in the factories or stores.
The next thought was just what could she do in the home; she hoped to avoid taking in roomers or lodgers, feeling that if she could make an effort to avoid this it would be better for her children. Soon there appeared a sign hung from the door:

HOME BAKERY PARTY and WEDDING CATERING
and on display was a wedding cake decorated just to show the style and to give folks who might come in the idea of the business she intended to make a success of.
To get the business started this little housewife made small sponge cakes and took them to the grocer's and let them to be sold on commission. Each cake was wrapped in a piece of waxed paper, and a little note inside telling who made the cake and requesting people to call and see the shop. Today, in less than two years, in spite of all the talk of hard times, this little lady is making on an average \$65 each week. While visiting Mrs. Lennet at her home I had the pleasure of seeing her prepare a wedding breakfast, and a supper dance. I know both the menu and method used in preparing the food will interest you.

Wedding Breakfast for Fifty Persons
Cantaloup Cocktail Alaska
Potato Croquette Tartar Sauce
Asparagus Salad Ice Cream
Wedding Cake Coffee
Silver Fizz, to toast the married couple
Bon Bons

The charge was \$10 per plate, this to include the flowers for the table, the wedding cake and the favors. I am particularly anxious for you to have the recipes and amounts, for you could easily duplicate this menu for nearly one-third less.

The Wedding Cake
The pan was made specially for the cake and measured seventeen inches across the top and was ten inches deep. It required three hours to bake the cake in an oven of 300 degrees Fahr. The cake was then allowed to set in a pan until nearly cold and then turned on a cloth. A piece of white paper was placed under the cake, making it easy to lift, without the danger of breaking the cake.

The Recipe
The recipe for this cake has been in Mrs. Munroe's family for nearly 200 years, coming from a great granddaddy who was a chef in Switzerland.
Place in warm bowl

One pound of butter,
Five cups sugar,
Cream with the hand until light, and fluffy, then remove the cream mixture from the hand and use a wooden spoon and cream again, adding the

Yolks of fifteen eggs.
When well creamed, add
Eighteen whole eggs.

Beat the yolks and whites together as for omelet—that is, until good and light. Now add

Three pounds of pastry flour,
Two ounces of baking powder,
Three and one-half cups of milk,
Two tablespoons of extract of nutmeg,
Two tablespoons of vanilla extract.

Beat for thirty minutes. Line the pan with three thicknesses of well-greased and floured paper and turn in the prepared mixture and bake as directed. It is almost impossible for one person to make this cake alone. Mrs. Munroe divides the recipe in half and her helper makes up half the batch at the same time, so that it is all ready to turn in the pan together.

To prepare the flour use pastry or cake flour, add the baking powder to the flour and sift the mixture.
When the cake is cold, trim to shape if necessary and cover with a coat of plain water being given in the icing lesson; then the next day ice again and decorate. Make up a second batch of this cake and bake in muffin pans for the cake for guests to carry home with them. Keep the batter, while waiting to bake, in refrigerator, and fill the muffin pans as they bake and are empty. Ice and decorate the individual cakes in same style as the wedding cake.

Supper-Dance Menu
This was an alfresco affair, and each gentleman guest was served with a box containing a supper, picnic style, for himself and partner. A small jug and two glasses were placed upon a tray holding the carton.
The box contained:
Two chicken salads, four tiny rolls, buttered; two pickles, small paper cup of salted almonds, two small tomatoes stuffed with relish, two paper plates, one knife, two forks, two spoons, two napkins.
Ice cream and cake were passed among the guests after they were all seated.

WHAT'S WHAT
By Helen Decie

Business introductions, informal though they seem, often lead to the good-fellowship of congenial friendship. There is no need to be "fussy" about social superiority, real or fancied, when introducing one man to another. Of course, it is understood that respect is paid to advanced seniority; thus, a young man is presented to an old man, not the elder to the junior.
Even a casual introduction should be worded in the right way. It is not correct to say, "Mr. Archer, meet Mr. Stonewall." The introducer may say, "Mr. Archer, I want you to know my friend Stonewall," or vice versa, or the more conventional form, "Mr. Archer, please introduce me to Mr. Stonewall." Mr. Archer may present Mr. Stonewall as he may be preferred.

Things You'll Love to Make
Doll-Handle Parasol
Paris is introducing all sorts of novel parasols. Here is a DOLL HANDLE PARASOL that is as chic as any of them. If you have a parasol with any kind of a knob handle, you can easily fashion it into one of these. Pad the knob with cotton, then cover it with a circle of cheesecloth. Paint the cheeks pink, the lips red and add two black bands for the eyes. Stitch the mouth in old yarn. Braid or twist black or red or yellow yarn, whichever color will go best with the color of the parasol to make the hair. Glue or sew it on to the head of the doll. Dress dolly in any style you wish. The one pictured has a lace ruffle around the neck. The face was dyed to match the color of the parasol. The frock is of black silk. If many ruffles of lace are sewed on under the frock, a charming effect is given when this DOLL HANDLE PARASOL is held in an open position.

After-Dinner Tricks
No. 211—The Nine Dots
Mark nine dots on a piece of paper (Figure 1). Ask any one to take a pencil and draw four straight lines that will cross all of the dots, without removing the pencil from the paper during the operation. They will try for some time and will then probably say it can't be done.
The trick, however, is very easy when you know it. Figure 2 gives the solution. Draw the lines as shown there, in order they are numbered (1, 2, 3, 4) and the trick is done.

Alkali in Shampoos Bad for Washing Hair
Most soaps and prepared shampoos contain too much alkali, which is very injurious, as it dries the scalp and makes the hair brittle.
The best thing to use is Mulified coconut oil shampoo, for this is pure and entirely greaseless. It's very cheap and beats anything else all to pieces. You can get Mulified at any drug store, and a few ounces will last the whole family for months.
Two or three teaspoonfuls of Mulified in a cup of glass with a little warm water is all that is required. It makes an abundance of rich, creamy lather, cleanses thoroughly, and rinses out easily. The hair dries quickly and evenly, and is soft, fresh looking, bright, fluffy, wavy and easy to handle. Besides, it loosens and takes out every particle of dust, dirt and dandruff. Be sure your druggist gives you Mulified.—Advertisement.
