

What Lillian Russell Said About the Brains and Beauty Idea This Woman, Who Had Both, Thought Each Should Be Cultivated Equally by Girls Who Want to Make Good Impressions and Sustain Them

ONE of the axioms which the late Lillian Russell offers in her autobiography as guidance for other women in their way through life is: "Your appearance is but your introduction; your reality is within."

Can You Tell?

Where Witch Hazel Comes From? Witch hazel, which was introduced into general use by the barber, is an American product derived from distilling the leaves and bark of a shrub known to botanists as Hamamelis virginica.

Adventures With a Purse

MARGARET was going away for her vacation and had been told to bring bathing shoes with her because of a variety of accidents in the beach which would poke into her feet.

WHAT'S WHAT

Please Tell Me What to Do

By CYNTHIA

Letters to Cynthia's column must be written on one side of the paper only, and must be addressed to "Cynthia," and must be accompanied by a return address.

To "Undecided" Look for your answer in the Woman's Exchange.

Youth Is Cause, He Says Dear Cynthia—I am a reader of your wonderful column and I very much appreciate it if you will print the following:

In answer to "Blue-Eyed Blonde" I would like to express my opinion. There are plenty of young men such as you mention, and you are not meeting them. You are not at fault. Youth is to blame.

A Nice, Healthy-Minded Girl Dear Cynthia—I've never written to you before, but I have been thinking of people's ideas seem to be that all girls are flappers, and that all they want to do is to get into a dress and go to the movies.

Dear Cynthia—In my opinion, I believe in type and expressions you have mentioned and would like to write you through Cynthia's column.

"Peggy" to "Sentimental Tommy"

By MRS. M. A. WILSON

Dear Cynthia—Would you be kind as to print the following in "Sentimental Tommy":

Well, Tommy, I must say you are one of the broad-minded young fellows. If there were a few more like you there would not be any flappers.

Let me tell you that if I were a fellow and had my choice of the two girls to make my wife, I would choose the one who is a flapper.

As for smoking, it is all right for older girls, they don't look so childish doing it. But if a young girl smokes, it is all right for her, too.

Dear Cynthia—A week and a day have passed since a lonely and homesick pilgrim in far-distant Arizona boarded an automobile and started on his way.

Friend De Jure—Greetings! He who was there when you were a little girl, and who is still there now, is the one who is the best of friends.

STUDY YOUR PLANTS NOW

Summer is the time to plan autumn flower planting. The best time to study plants is when foliage has reached its full size and plants are in bloom.

Home builders who are not acquainted with the different kinds of plants will find no better way of becoming so than by making a study of them in parks and on lawns.

Delphinium plants are usually safely planted in September and October or in the spring. They may be planted any time in the summer if the plants are cut off in the fall and shade them for several days after they are set out.

Achillea the pearl, commonly called ball of snow, is another one of the hardy old-fashioned flowers that die down in the fall and come out again in the spring.

The hardy delphiniums or inkeepers are principally in blue shades. The former is dark blue with white throat, and the plant is a luxuriant grower.

The gold medal hybrids have all shades of blue, some varieties show a distinct pink, while others are close to maroon.

Mrs. Wilson Gives Recipe for Making Both Plain and Fancy Pastries

It Is Easy to Learn How to Make French Delicacies, but the Difficulty Lies in the Selection of Flour

By MRS. M. A. WILSON

THE making of a delicate light French pastry is quite easy to learn, and once the art is acquired, the secret of dainty pastries is not so hard to learn.

Place in mixing bowl four cups of hard wheat flour, one teaspoon of salt.

Three level teaspoons of baking powder. Sift twice.

Two-thirds cup of shortening. Cut the shortening into the flour, using a spatula, until fine, then add one level tablespoon of cold water.

Divide this paste into three parts. Each part will make a lower and top crust for a nine-inch pie plate, a lower and top crust for two very large pies and a lower crust for lemon or custard pie.

"Period Styles" in Furniture. The term "Period Styles" in furniture means the different styles or types used at certain definite historical periods.

The types of "Period Furniture" reproduced in England and America from the time of Louis XIV to the time of Napoleon, and those made in Italy at the period of the Renaissance.

Besides the numerous period types reproduced, there are many adaptations based upon one or more of the historical types. Some of these adaptations are admirable, while others are indifferent in style.
