

**Uncommon Sense : If You Had a Million Dollars**  
By JOHN BLAKE

WHAT would you do with a million dollars—keep it or spend it? If you would keep it, how would you keep it? If you would spend it, how would you spend it? A young man who was lately left a million dollars by his father at first refused to take it on the ground that it could do him no possible good. Afterward he accepted it and immediately gave three-quarters of it away for "social service."

GREAT many men who have made a million dollars give away some of their millions which also are devoted to "social service."

**After-Dinner Tricks**

No. 241—From Six to Seven  
Cut out the largest of the above diagrams and paste it on a card. Ask some one to count the number of cubes he sees. He will say either six or seven. Whichever he specifies, you state that he is wrong. Tell him to look carefully and count the cubes again. After he has looked intently at the diagram he will be unable to tell just how many he does see—six or seven.  
The diagram forms a very deceptive optical illusion and can be viewed in two different ways, as shown by the smaller diagrams. When the pile of cubes appears as in the small diagram A, there will be six. But when looked at for a moment the cubes will shift to the position of those in B, and there will appear to be seven.

**BEACH WILL STAY OPEN**

Mayor Announces League Island Will Run on Borrowed Help  
The League Island Bathing Beach will continue open until September 1, despite failure of Council to make an appropriation. Announcement to that effect is made by Mayor Moore. He said Directors Caven and Warburton had borrowed men and women from other work for the purpose.  
"The Chief of the Bureau of Highways," the Mayor said, "had photographs taken of the bathers frequenting the beach Saturday and Sunday, and, although it was cloudy, the beach presents the appearance of a veritable Atlantic City. As soon as convenient, Director Caven will go over the boat-house on the second lake, with a view of making arrangements, if possible, for opening it up as a bathhouse. In conjunction with the existing bath houses,

for which we are temporarily borrowing help.  
"The people certainly are enjoying the facilities for bathing which have been afforded them at the League Island bathing center, and we shall do all that is possible to continue and enlarge those facilities."

**How Science Helps Us To Protect the Milk You Drink**

ALTHOUGH Abbotts milk has been carefully safeguarded from its very source at the farm, it is again rigidly inspected upon its arrival at the city plant at 31st and Chestnut Streets.

In a laboratory of glass and white enamel, white uniformed women, trained in the chemistry of milk, test it to determine its purity, freshness and cream content.

Just as Abbotts originated "A" milk in Pennsylvania, Abbotts were also first in Pennsylvania to institute the Laboratory Control of milk in the country.

Today it is recognized as an essential factor in the production of pure milk.

Abbotts "A" milk, safeguarded as it is, makes a safe, nourishing and delicious food for you and your family.

Order it from the man on the Abbotts wagon, or telephone Baring 0205.
